26th ANNUAL REPORT 2006 - 2007

Magic! No it is real

Most cost effective, reliable and maintenance free.....yet simple!

NeumaFeed
Automatic Hopper Loader
Patent Pending

an innovative system
a fresh idea.

It is effortless.

- Can feed plastic raw-materials (granules or powder) to the hopper on the machine, straight from closed bags or containers placed on the floor.
- So, no chance of absorption of moisture from atmosphere by the material
- No scope of contamination with other materials or oils around, even inadvertently
- No spilling, no sweepings and loss of materials.
- Each machine can be fed independently; so, flexible in operation.
- Multiple machine feeding is also possible
- Instantaneous response and infinite flow rate control by regulating air pressure.
- No vacuum blowers and motors; so, power saving.
- Virtually maintenance free as there are no moving parts.
- Parts to be cleaned are negligible; so, material changeovers can be effected quickly, enhancing productive time of machine.
- Fully automatic with level control.
- Very easy to install and operate.

It has all that you wished for in a hopper loader, with an edge over others.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

We could best comprehend the economic health in the country, by the GDP Indices. They are no doubt, very comforting. Though the pace of growth varies across the different segments of the Industry and services, together they constitute a rapidly expanding market for electric energy; which is now starved of it!

Thus, while the holistic picture of opportunity is exceptionally gigantic, the business possibilities in the individual elements of the chain are challenging - whether in power generation, transmission, distribution or consumption that is vastly dispersed.

The country has problems to be resolved, starting from the available choices on fuel and technology, to the infrastructure and resources.

Our company has three divisions viz., Electrical, Plastics and Wind Power Generation.

Opportunities and Threats

Opportunities:

Electrical Division:

The custom-engineered control panels assembled by us are meant for integrated control of Textile Machinery and Machine Tools. These industries are on a firm ground and registering a healthy growth.

Our OEM customers are amongst the largest and most renowned in the manufacture of Textile Machinery and so business prospects are on a secured ground.

Other Diversified products like LV Switchgear, Motor Protection & Control devices, Automatic Power Management systems, Automation devices have a vast space in the Industrial market arena.

Plastics Division:

Our activity is focused on Engineering Plastic Components. For many economic and technical reason there is an unrelenting shift from metal to plastics in almost every branch of engineering industry. The scope is endless.

Wind Power generation:

In a perpetually power hungry situation the Wind Power is one of the most sought renewable and clean energy source. So the investment in wind Turbine generators is a sound and of National interest.

Threats:

The cyclical nature and social sensitivity of the textile industry is a constant source of anxiety. But, the inherent strengths of our Country in raw materials, abundance of cheaper labour & technical manpower and large domestic market are our positives.

In the area of Low Voltage products, catering to the power consumption end of the chain, which is unquestionably very large. The spread of products in the market is, at one end highly sophisticated and hi-tech and at the other cheap and commoditized, with a lot many in between. Our choices are dictated by the technology we possess or could access. There is virtually a flood in the segment of low cost matured designs. So the opportunities lie in technology, where the options are to buy or develop in-house. Our quest is on, in both directions.
