(E) Management Discussion and Analysis Report :

Industry Structure and Developments : The contribution of IT & BPO Sector in India's economy is much higher than its export achievement of the brand equity in foreign markets that has raised India's economy profile abroad. The BPO industry today boasts over turnover of \$ 12 billion & employs 23,00,000 staffs. The NASSCOM - McKinsey 2009 report estimates that the combine IT & BPO industry workforce is increasing by 26% annually. Despite of global meltdown India is still the leader in the world in IT & BPO.

As the Indian ER & D services off shoring industry is ingraining deeply within the customer value chain, it is becoming increasingly critical to augment its capabilities to engage in end-to end product development initiatives in both traditional verticals and emerging verticals. Globally offshorable revenues of these above eleven verticals are expected to reach between USD 90-100 billion out of which would garner a 40% share by 2020 equivalent to USD 40-45 billion from the current share of USD 7.9 billion.

BPO Business – The Indian domestic market has undergone a transformation over the past decade-rising from the periphery to emerge as a rival, high potential support unity for the country's IT-BPO sector.

BPO Destinations – India, Malayasia, Vietnam, Singapore, Philippines, Latin America, Eastern Europe, South Africa and recently Egypt are considered as a significant BPO destinations. The industry creates lot of job opportunities for youth and brings overall growth for the country.

Future of Indian BPO – The US and European region account for over 85% of the revenues of the over \$ 70 bn Indian IT sector. NASSCOM had in February presented a conservative outlook of 16-18% growth in IT exports in 2011-12 in the wake of the slow economic recovery in the US and uncertainty in the European region.

The growth in software and services exports is expected to be 16-18% and the sector is stated to bring in revenues of \$68-70 bn. The growth in the domestic market is estimated to be 15-17% with revenues of about 19-20 bn.

Risks & Concerns for Indian IT Industry – Though demand conditions have been optimistic, the Indian IT sector is exposed to certain risks which may hinder growth rate. An appreciating Rupee, slow down in US economy, shortage of skilled manpower, limitations in domestic infrastructure and competition from other global players. Services provided at a low cost by China, Philippines and Vietnam are threat to Indian Companies. The employment and growth has reduced to 16%. Apart from this increasing activities of global MNC's is making it difficult for employee retention for Indian Companies.

On the financial front wage inflation of 15% can reduce the top line as well as the bottom line of the companies. Shortage of experienced and skilled call centre professionals is another concern for the industry. In voice based operations infrastructural support as to Zero break down is another contingentous factor which affects revenue.

Opportunities and threats – NASSCOM & McKinsey & Company conducted a comprehensive study to develop a perspective on the potential of the RIM industry. This report, the rising remote infrastructure management opportunity : Establishing India's Leadership, details the potential of the remote infrastructure in management.

Service providers are expected to enhance focus to domestic market to derisk business & tap into the local growth opportunities. Lack of working age population in the developed economies & a significant long term cost, arbitrage indicates India's sustained cost competitiveness. There are a large number of multinational IT enterprises operating in India in sectors such as :- Integrated chip design, system software, communication software, R & D centres, Technology support sector, captive support sector, BPO sector etc. reaping the cost and quality advantages.
