3. OUTLOOK & PROSPECTS

The Indian Economy is increasingly becoming entwined with the World economy such that any positive or negative developments in the global economy are likely to affect the rate at which our economy may grow. As also pointed out by the Economic Survey 2016-17, "If the world economy lurches into crisis or slides into further weakness, India's growth will be seriously affected, for the correlation between global and Indian growth has been growing dramatically". Further, it says that "This year's Survey comes against the background of an unusually volatile external environment with significant risks of weaker global activity and non-trivial risks of extreme events. Fortifying the Indian economy against possible spill overs is consequently one obvious necessity. Another necessity is a recalibration of expectations." It is obvious that the Indian Economy is vulnerable to international forces.

However, the outlook for the Indian economy is also to be analysed with respect to the performance of the domestic sectors that may be considered as the growth drivers of this third largest economy in the World. It may also be considered that the Indian economy has been consistently showing increasing resilience to the major external shocks be it a slow-down in the Chinese economy or the increase in fed rates or the news of the Greece reaching on the brink of default to cite a few examples.

As explained by the Economic Survey report itself, "Start with the comparisons with other countries, at a time when the newest normal for the world economy is one of turbulence and volatility, India is a refuge of stability and an outpost of opportunity. Its macro-economy is robust, and it is likely to be the fastest growing major economy in the world in 2016..."

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Inflation, the fiscal deficit, and the current account deficit have all declined, rendering India a relative haven of macro stability in these turbulent times. For an economy where exports have declined due to weak global demand and private investment remains weak, India's economy is performing remarkably well. "Economic growth appears to be recovering, albeit at varying speeds across sectors."

Indian economy has grown by 7.9 per cent in March quarter to consolidate India's position as the fastest growing economy with a five year high growth rate of 7.6% for the full fiscal according to the data released by the Central Statistical Office. Considering that the Economic Survey projects India's long-run potential GDP growth as substantial, about 8-10 percent, your Company sees a good opportunity for improvement of its performance in the near term.

4. SHARE CAPITAL

There was no change in the share capital of the Company during the year under review. The paid up equity capital remained at Rs.800 Lakhs comprising of 80 lakh shares of Rs. 10 each as on March 31, 2016. The Company has not issued shares with differential voting rights nor granted stock options nor sweat equity.
