3. OUTLOOK & PROSPECTS

The Indian economy is poised to grow at about 7.3% in the current fiscal. A series of major reforms have been undertaken over the past year. The most explicit reform was brought about through the launch of Goods and Services Tax (GST) at midnight on July 1, 2017 which completely transformed the way in which the indirect taxation system works in India. In order to address the continuing menace of ever increasing number of Non-performing assets and to ease out the long-fester Twin Balance Sheet (TBS) problem of the Indian commercial banks, a major reform was brought towards speedy resolution of corporate insolvency cases under the new Indian Bankruptcy Code. Also, a massive recapitalization package was implemented to strengthen the public sector banks grappling with the incidence of ever increasing burden of the NPAs particularly from large accounts.

In the second half of the financial year 2017-18, the economy has shown robust signs of revival, which is remarkable in light of sudden and unexpected outcomes of major decisions like demonetization, teething difficulties in the implementation process of the new GST, rising incidence of real interest rates, an intensifying impasse emanating from the TBS challenge, and sharp falls in certain food prices that impacted agricultural incomes that it had to bear with in the first half of the year thanks to corrective actions taken and the increase in exports due to synchronous global economic recovery.

No wonder, as the business climate improved due to multifarious policy measures and favourable macro conditions, India jumped 30 spots on the World Bank's Ease of Doing Business rankings. This was commemorated by over 20% increase in the foreign direct investment (FDI) flows to India and a sovereign ratings upgrade, the first in 14 years.

According to Economic Survey 2018, "as a result of these measures, the dissipating effects of earlier policy actions, and the export uplift from the global recovery, the economy began to accelerate in the second half of the year. This should allow real GDP growth to reach 6% percent for the year as a whole, rising to 7-7½ percent in 2018-19, thereby re-instating India as the world's fastest growing major economy..."

However, at the same time there were concerns "relating to macro-economic stability. Fiscal deficits, the current account, and inflation were all higher than expected, albeit not threateningly so, reflecting in part higher international oil prices—India's historic macroeconomic vulnerability..." opines the Economic Survey. However, things may improve if the efforts towards simplifying the GST for good, improving private investment and exports and implementing a transparent resolution process

for corporate insolvency continue with policy focus on generating more and more employment, health and education facilities particularly in the rural area. Recently, the IMF, ADB and the RBI and many other independent reports have expressed a positive outlook for the global economy in general and the India economy in particular subject to some limiting forces being favourable too.

In the light of the business and macro scenarios in the contemporary times, your company sees good opportunities for growth in the current fiscal and in the medium term.
