1. BRIEF DESCRIPTION OF THE COMPANY'S WORKING DURING THE YEAR

Translocation to the new site has been completed except for a few minor services which would be done as we take up those product lines. Initially, we have started with Single Sided FR4 PCBs and added a new SS PCB category of Metal Core PCB's to tap the rapidly growing segment of LED applications. Our long-term strategy is to reduce our dependence on PSPTH PCBs and be a significant player in the high-quality MCPCB sector. Automotive PCBs is another segment which has grown by leaps & bounds, during the years we were dormant and battled on the revival front, and we have started making forays in this segment too. Ramping up volumes with large OE buyers is a multiple stage process involving initial contact, vetting of our infrastructure, sample orders for trial & testing (testing takes 3 to 4 months minimum), visit to the plant by buyers, release of medium volume orders & on successful completion of medium lots the bulk orders commence. The whole cycle starting from initial approach can take anywhere from 6 to 9 months. Since all customer contacts are not initiated at the same time, there is always something in the pipeline at their different stage-cycles hence volumes would commence picking up from the third quarter of the current financial year.
