MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Industry Overview -

India has emerged as one of the five countries in the world in terms of the number of people undergoing surgical and non surgical procedures. India is viewed as one of the most progressive countries for cosmetic surgical procedures and this trend is expected to continue in the future. Cosmetic surgery in India has evolved from being considered a risky or impractical procedure that was demanded by overly beauty conscious women to a highly specialized and advanced niche of plastic surgery that helps people attain happiness with fewer risks and greater affordability. This change in the mindset of people is a result of several factors. Firstly, the media has become much more widespread, disseminating honest and more detailed information regarding the safety of cosmetic surgical procedures. People are increasingly recognizing the fact that a plastic surgery is at par with adopting a new diet or exercise regimen since all such activities are aimed at the same objective, i.e. to improve one's appearance. Nevertheless, plastic cosmetic surgery offers an incomparable advantage to any other approach, i.e. the results are immediately visible and it can be customized with great precision.

According to industry experts, the cosmetic surgery market has been growing well in India as a result of increased awareness due to the easy availability of information and the rising exposure consumers have received through the internet as well as other forms of media. In India, the media has played a crucial role in changing the dressing sense as well as the outlook of consumers to matters such as cosmetic surgery. A procedure that was once looked at with suspicion has currently turned into a massive industry in itself.

Future Outlook -

The changing lifestyle and urbanization, growing awareness of cosmetic surgery procedures, availability of better infrastructure and the rising economic capacity are all driving the cosmetic surgeries market in India. India is bound to become favorite medical tourism space in the world.

Our Strategy -

Company presently has 7 branches viz. 4 (four) in Mumbai at Bandra, Andheri, Dadar & Chembur, 2(two) in Goa & 1(One) in Delhi but out of this only 5 branches of the Company were fully operative as on Mar'2013. Due to weak economic outlook and inflationary pressures, Company has restricted its branch expansion and is taking all precautions towards the same. However, once the economy starts moving, Company is highly upbeat about the business prospects of the Company. Considering the demand in the market the Company provides services like cosmetic and plastic surgeries, weight loss & hair gain treatment, dental surgeries and other dental treatments etc.

Performance of our Company -

During the year, Company earned revenue of Rs. 20,245, 277 /- and profit after tax for the year amounted to Rs. 438,258 & did turn around during the year, though marginally. The Company presently has 7 branches viz. 4 (four) in Mumbai at Bandra, Andheri, Dadar & Chembur, 2(two) in Goa & 1(One) in Delhi.

Internal Control Systems -

Your Company has adequate internal control procedures to commensurate with the nature and size of its business. Procedures ensure efficient and cost effective use of company's resources. Company has developed proper procedures to safeguard company's valuable assets against losses, to ensure timely and accurate preparation of accounts and compliance's of various rules and regulations.

Employee Relations -

Company had smooth relations with its employees during the year under review.
