MANAGEMENT DISCUSSION AND ANALYSIS

1. INDUSTRY TRENDS & DEVELOPMENT

The Company is engaged in the business of Sodium Dichromate and Chromic Acid. In view of tremendous competitive pressures and increasing regulatory compliances, this year has not been very positive for the Company. With the increasing role of technology, there is a paradigm shift in the running of the business. Your company is gearing up well to face all such developments by increasing its reach across geographical areas and client segments, ramping up its infrastructure and technological, financial and human resources.

2. OPPORTUNITIES & THREATS

Your Company's philosophy of providing professional, value-added, comprehensive and integrated solutions to a cross-segment of society across the Eastern Region is fast becoming a positive differentiating factor vis-a-vis erstwhile competition. These could be treated as great opportunities for the company. Company has initiated actions for evaluating substantial expansion. With the upcoming of new iron and steel industry in and around eastern India, the demand for company's product is expected to increase.

3. BUSINESS REVIEW / SEGMENT-WISE PERFORMANCE

The Company is taking effective steps for strengthening its Research & Development and building a strong, dynamic and highly motivated marketing team.

In spite of such competitive pressures, your company has done satisfactorily well to grow within the broad core business of the company. It does not have any segments/divisions.

4. OUT LOOK

Company is continuously looking for growth avenues. Company is drawing the strategies of expanding its business activities. Opportunities are being explored for export of Company's products with or without value and technological additions.

5. RISKS & CONCERN

Overall inflation has its impact on Company's products. Price of Sodium Dichromate is ruling high and traditionally has wide fluctuations. This has direct effect on various products.

Interest rates have firmed up which will result into higher cost of trading although some softening/stabilization is anticipated. The import tariff is on decline year by year. Company has to be competitive with international players for chemical products and there could be pressure on the margins. The Company is dependent mainly on mines in and around Eastern India.

6. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has a broad based control system which operates through various mechanisms. All the proposals involving expenditure above a certain basic amount are subject to financial concurrence through the Finance Department followed by approval from Senior Executive or Managing Director.
