Directors' Report and Management Discussion & Analysis Report to the Shareholders

The Directors present their 29th Annual Report on the business and operations of your Company and the Audited Financial Statements for the year ended 31st March 2015.

Financial Results

(Rs. in crore)

Description	2014-15	2013-14
Profit Before interest & depreciation	77.56	53.22
Interest	2.48	1.90
Depreciation	5.55	6.56
Profit Before Tax	69.53	44.76
Provision for Taxation	25.54	15.71
Profit After Tax	43.99	29.05

Operational Highlights

The performance during the year was the best ever in the history of the Company with turnover surpassing the Rs. 800 crore mark. The export sales increased from Rs. 17.58 crore to Rs. 33.67 crore highest ever recorded by the Company. The net profit for the year was higher by about 51% at Rs. 43.99 crore against Rs. 29.05 crore in the previous year.

Availability of bio mass fuel for the Captive Power Plant (CPP) continued to be limited and the input cost also went up substantially due to demand from other core industries such as paper mills. Alternate fuels for the CPP were used to ensure operations at optimum load, but with the cost becoming higher than the alternate power, the CPP was shut down during December 2014. The Company went in for purchase of power through energy exchanges and third parties to meet the short-fall.

The bulk storage facility at Ennore Port became operational during the year under review thereby ensuring uninterrupted availability of input material for the derivative plants. Import of PO during the year was about 10,000 MT which helped in better production and achieving highest ever turnover.

Financial Review

The year 2014-15 witnessed moderate changes in interest rates and the bank rate came down from 9% in March 2014 to 8.5% in March 2015. There was decline in the overall bank credit growth and also aggregate of bank deposits. The inflation also declined sharply mainly on account of lower crude oil prices and other steps taken by the regulators.

The Company has been reaffirmed with ratings of CARE A signifying low credit risk for long-term bank facilities and CARE A1 signifying lowest credit risk for short-term bank facilities.

Dividend

The Company is in the process of taking up capital expenditure plans to improve the sales and profitability further and needs to plough back the profits for the same to avoid interest burden. In the light of this, your Directors recommend a 10 % dividend i.e. fifty paise for every equity share of Rs. 5/- each fully paid-up, for the year 2014-15, aggregating to Rs. 8.60 crore, excluding dividend distribution tax. It may be noted that your Company has been declaring dividend continuously for the past ten years, in spite of the downturn in the economy experienced globally and in India during the earlier years.

Industry structure and developments

Your company specializes in propylene glycol, polyether polyol and operates in the Polyurethanes (PU) industry. Polyols find varied applications and caters to various industries such as automotive, refrigeration, insulation etc. Your company also manufactures propylene glycol for pharma, fragrance and industrial applications and continues to perform well in pharma, flavour and fragrance sectors. The off-take of PG for industrial applications was very low due to availability of alternate cheaper materials and unabated imports. Import of PG was also higher during the year opening up fierce competition, especially from major MNCs.

It may be recalled that the market became stagnant in 2013 due to various factors like overall economic slowdown, impact of global economic crisis on Indian manufacturers, inflationary pressures, etc. Some revival was seen towards the end of 2013-14 which continued during the year under review. Automobile, pharma and refrigeration sectors registered substantial growth at 8.68%, 9% and 7% respectively. The market for MPL's products also grew by about 10% which helped improved performance of your Company. During the year, MPL's performance was impressive with increased production, turnover and margins. However, the ever increasing import of polyol into India continues to be a major concern for domestic manufacturers.

Opportunities and Threats

Polyurethane materials, due to their versatility, perform extremely well as part of any application that is subject to dynamic stress. They provide many advantages including: resilience, high tear resistance, low viscosity and low heat build-up. Polyurethane can be used for varied applications like building insulations, refrigeration, furniture, footwear, automotive, coatings and adhesives, sealants etc. The development of polyurethane materials is still evolving and new applications are regularly being created. The Indian PU market is rapidly growing which has registered double digit growth during the past five years and is expected to double every four years in the coming decade. This has thrown open excellent opportunity for MPL to improve the operations further.

The Make in India initiative is also likely to give a thrust to local manufacturing to be achieved in the next 2-3 years which will also provide further opportunities to MPL to improve its performance.

On the negative side the Indian PU market is flooded with import of Flexible Slabstock Polyol which is a major product of MPL. During the year under review, the FSP imports were close to 70,000 MT, 30% more than the previous year. The PG imports also continued to be higher in the range of over 54000 MT.

With the major capacity additions by the competitors in Thailand for PG and in Singapore for Polyol becoming fully operational the imports into India are set to go up further, which could result in a price war and affect the margins of the Company.

Market Scenario

During the year under review, the Indian PU market performed better than the previous year. Though imports continued to flood the domestic market, your Company achieved a turnover of Rs. 814.13 crore against Rs. 618.51 crore in FY 2013-14, higher by about 32%. Export sales during the year increased by 91% over last year. The improved performance was mainly on account of foraying into new markets and adding new customers. The margins also improved through various actions taken for higher productivity and better pricing strategies.

Risk Management Policy

The Company has over the years developed a frame work for risk management and laid down procedures to inform Board members about the risk assessment and minimization procedures. A risk management plan has been framed and implemented and monitored by the Board. As required under S. 177 of the Act, the Audit Committee also reviews the risk management process periodically.

As part of the risk management plan MPL has two employee-level Committees viz., a sub-committee and an Apex Committee which is headed by the Wholtime Director (Works) to review and assess the risks that could affect the Company's business. The sub-committee brings out the matters that could affect the operations and the same are reviewed by the Apex Committee, which determines the issues that could become business risk. The mitigation actions are also suggested by the Committee and the report of the Risk Controller is submitted to the Risk Management Committee of Directors (RMC), constituted in compliance with the Listing Agreement. The Committee which comprises Ms. Sashikala Srikanth as Chairperson and Mr. Muthukrishna Ravi, Managing Director & Mr. T.K. Arun, Director as the other members reviews the report of the Risk Controller and the recommendations are presented to the Board for final decision/guidance.

Risks and Concerns

The duty concessions for import of polyols and other products under the free trade agreements with ASEAN countries led to dumping of overseas materials into India, denying level playing field to the local manufacturers and was a great cause for concern. As stated earlier the MNCs who have set up their new facilities elsewhere with high capacities have commenced seed marketing in India to provide a strong base for their products and hence the competition and the price war could worsen in the near future affecting the performance. Your Company's efforts to curb this hazard through avenues available under the applicable law are continued. Though the Company was successful in its efforts to bring Anti-Dumping Duty on import of FSP from Singapore, EU and Australia, this had no major impact on the imports, which continue unabated. Further new polyol capacities in Singapore, China, Saudi & Thailand will continue to keep the margins under pressure in the coming years.

Outlook

The WTO has forecast an aggregate trade growth of 3.3% for the year 2015, slightly more than the growth of 2.8% in 2014. This seems to be a good sign in terms of the possible increase in the domestic demand in the coming years. However, the huge capacities created by MNCs abroad could result in further dumping of PG and Polyols into India, again leading to a price war and cut in margins.

In order to overcome the setback, your Company has taken steps to develop new applications for its products like footwear, seat cushions for two wheelers, specialty polyols, drilling applications, water proofing, etc., while also taking care of its commitment to environment. Some of these have been completed and commercialized during the year under review. The Company is in the process to develop product applications in medical devices.

With the in-house PO capacity remaining static, the bulk storage facilities for imported raw materials in Ennore Port has become a shot in the arm for the Company to increase the capacity of the derivative plants and go for more of value added products. The PO capacity will also be increased through an arrangement with an Associate who have obtained Environmental Clearance for converting their existing facilities to make PO. This has paved way for considering further capacity additions for the derivative products.

These are expected to help the Company in facing the tough competition from MNCs in a better way. As a way forward the Product Development team has been strengthened and new market avenues are being explored with specific thrust on exports.

Environment and Safety

Your Company has laid down clear policies for quality, environment and safety and has set-up various teams and committees to monitor and improve observance of the said policies. Besides periodical in-house reviews and audits, surveillance audits of ISO 9001 and ISO 14000 have been done regularly, ensuring proper adherence to the quality, environment and safety requirements. World Environment Day is celebrated and to mark the occasion tree planting and similar activities are undertaken.

Your Company pays special attention to safety of men and material and various competitions are held during the Safety Week to create awareness among the employees about the need to adhere to safe manufacturing practices.

Audit Committee

The details of the Committee are furnished under the Corporate Governance Report (CGR) annexed to this Report. All the recommendations of the Committee were accepted by the Board.

Vigil Mechanism

As required under S. 177 of the Act and Clause 49 of the Listing Agreement, the Company has established a vigil mechanism for directors and employees to report genuine concerns through the whistle blower policy of the Company as published in the website of the Company. As prescribed under the Act and the Listing Agreement, provision has been made for direct access to the Chairman of the Audit Committee in appropriate or exceptional cases.

Human Resources

Your Company believes that achievement of its goals is reliant on the abilities of its workforce to convert the plans into actions. Therefore every effort is taken to retain the talents and also introduce newer ideas from the younger generation, for the success story to continue. Various HR initiatives are also taken to enhance the competency of the employees through inclusive decision making process by delegation, recognition, leadership development, etc. Your Company imparts need based training to its employees with special focus on youngsters, stimulating them to play an important role in shaping the Company's future. The industrial relations have generally been cordial, except in relation to a wage dispute with the workmen from 2001, being contested in the Supreme Court. The Management's efforts to settle the issue through dialogues have not been fruitful.

As on 31st March 2015, your company had 312 employees on its roll at different locations including Senior Management Personnel, Engineers, Technicians and Trainees.

Related Party Transactions

During the year under review, there were no transactions with related parties referred to in S. 188(1) of the Act. The other transactions with such parties were not material in terms of the policy framed by the Audit Committee of the Company as published in its website viz., http://manalipetro.com/Policy_1.html.
