Greaves Morganite Crucible Limited**ANNEXURE TO DIRECTORS' REPORT FOR THE YEAR ENDED 31ST MARCH 2003****INFORMATION RELATING TO THE CONSERVATION OF ENERGY, TECHNOLOGY ABSORPTION AND FOREIGN EXCHANGE EARNINGS AND OUTGO PURSUANT TO SECTION 217(1)(E) OF THE COMPANIES ACT, 1956 READ WITH THE COMPANIES (DISCLOSURE OF PARTICULARS IN THE REPORT OF THE BOARD OF DIRECTORS) RULES, 1988****A. CONSERVATION OF ENERGY :****a. Measures Taken : Electrical Energy**

Along with Power Factor improvement system, Beblec make energy saver is installed. The Power Factor is maintained at 0.99 or unity. Due to these systems, there is reduction in consumption of KWH/ MT production.

Fuel : LPG Consumption

To measure, more precisely the LPG consumption two numbers of Gas Totalisers were procured and installed on Kilns. Replacement of modules and refractories is carried out on regular basis. Loading of the ware is also optimized. However during the year the controlling instruments showed malfunctioning resulting in inconsistent sintering of product. The unsintered products were resintered. This has resulted in higher LPG consumption per metric ton.

- b. Additional Investments and proposals if any, for reduction of consumption of energy. :
- a. For Kiln No.1 new programme along with air/gas ratio regulator is being procured from UK. This will help to reduce % of unsintered product and improve quality of product. An amount of Rs.0.34 lacs is considered for procurement of imported instruments.
 - b. For Kiln No.2 the entire specifications are being studied and to improve performance of Kiln, modification of Kiln is under study. The main aim of modification is
 - a. to reduce sintering temperature and thus reduce LPG consumption
 - b. to minimise expenses on refractory consumption.
 - c. Improve automation to increase efficiency and improve product quality. The modification cost is estimated at Rs.12.00 lacs.
