

Transforming Markets

Redefining Business

— ANNUAL REPORT 2010 – 11 —

Transforming Markets Redefining Business

A commodity exchange unlocks true value only when it creates an efficient and well-developed marketplace. As exchanges are integral to the broader ecosystem, efficiency can be achieved only when they develop market linkages with it and engender wide participation. With commodity derivative exchanges focusing on increasing shareholder value, the industry has been witnessing continued innovation and greater operating efficiencies.

MCX facilitates transparent platform for price discovery and faster trade execution. The Exchange empowers market participants in the commodity ecosystem with market-discovered price information, product and service innovations, scalable technology platform and modern trade mechanisms. Its exchange related support infrastructure and network of strategic alliances enable it to penetrate new markets, enhance its product offerings and increase its market presence. As part of its ongoing efforts to promote participation in the commodity futures market in India, MCX uses the print and electronic media, and conducts awareness / training programmes.

MCX's efforts are aimed at developing a mature Indian commodity futures market, which may, in turn, contribute to our growth. Through its innovations and efficiencies, MCX's vision is to *transform India's commodity markets and in the process redefine business.*
