NOTHING ELSE WILL DO

The Scorpio has been launched. It is a vehicle we are proud to have created. M&M's (and India's) first indigenously developed Sports Utility Vehicle. An off road vehicle with car like comforts. International quality inside and sophisticated styling on the outside. The best that Indian brains and international collaboration can offer, in one gleaming package.

For us, the Scorpio is more than a new product. The Scorpio is a journey to find the best in ourselves. Yes, the Scorpio is not just about a new product. The Scorpio is about changing the way we do things. It started with a dream that became a driving vision - to produce a vehicle that would take M&M into the ranks of top class auto manufacturers. It meant jettisoning the past. Past platforms, past techniques, past approaches. Instead of the end point, the customer became the beginning. It was the customer's needs, dreams and aspirations that dictated the conceptualisation of the Scorpio.

Instead of the platforms and methods of the last fifty years, we started from the ground up. We imposed new design and manufacturing systems upon ourselves, that demanded total validation and quality before the process could move from one stage to the next. At every stage we subjected our efforts to ruthless criticism from internal and external panels. Every bit of feedback was studied and assimilated and used to make improvements. No detail was too insignificant to deserve our attention. We changed our manufacturing facilities, making them state-of-the-art. And we offered the Scorpio to the world.

Post sale, the change continues. We are changing the way we sell vehicles, so as to give each customer an unforgettable experience. We are changing the way we deal with the customer at every stage.

We are encouraging our dealers to see the customer not as a one time sale but as a life long partner. Most importantly, we are changing the way we think about ourselves and about our products.

In the process of making these changes, we have discovered the best in ourselves. We have discovered that we have the skills and the competence and the talent to design a top class vehicle from scratch. We have discovered that we can live up to the core belief of our founding fathers that Indians are second to none. We have discovered that the more we demand of ourselves, the more we achieve. And we have discovered that, like a magic lamp, the spirit of the Scorpio has rubbed off on everything we undertake. The same quest for excellence drives the Farm Equipment Sector whose tractor sales have grown 77% in the heart of Tractor Land - the USA. The same spirit of excellence has driven Mahindra Holidays to re-invent itself to emerge as the largest player in the domestic time share industry. The same spirit of excellence has driven Mahindra Financial Services to rural areas where no other financial services company has gone before. The same spirit has propelled Mahindra Gescio into the leadership position among corporate construction houses.

The Scorpio has taken us on a voyage of discovery. And it has become a symbol. A symbol that the journey never ends. A symbol of the quest to continuously become better than we are. A symbol of the determination to demand more and more from ourselves. A symbol of the imperative to be leaders in whatever businesses we undertake. Because, for us, as the Scorpio advertisement emphasizes "Nothing else will do".

PERFORMANCE REVIEW

In a year that saw some deceleration in the Utility Vehicles Industry, your Company outperformed the Industry, supported by a strong demand for its new product offerings. The Tractor Industry as a whole was adversely affected by several factors, and, in keeping with this trend, the sales numbers of your Company were also lower. Nevertheless, the Automotive and Farm Equipment Sectors maintained their market leadership, and increased their retail presence through several new offerings, continuous product refinements and customer relations programmes. Both the Sectors have effected a reduction in the pipeline inventory and aligned stocks with market demand. Exports of both vehicles and tractors have significantly increased. Your Company has also started making its presence felt in the three wheeler market; it sold 2,950 three wheelers in F-2002 as against 191 in F-2001. A relentless focus on cost re-engineering and right sizing initiatives have impacted your Company's operating margins favourably.

The profit for the year before Depreciation, Interest, Provision for Contingencies, Exceptional item, Taxation and adjustments pertaining to previous years was Rs. 325.23 crores as against Rs. 352.48 crores in the previous year. Profit after tax was Rs. 102.69 crores as against Rs. 120.55 crores in the previous year.

A detailed analysis of the Company's performance is contained in the Management Discussion and Analysis Report, which forms part of this Annual Report.

DIVIDEND

Your Directors have recommended a dividend at 50% (Rs. 5 per share). A pro-rata dividend will be paid on 55,24,219 shares allotted during the year. The dividend will absorb a sum of Rs. 56.21 crores (previous year Rs. 66.97 crores, including tax on dividend) and will be paid to those shareholders whose names stand registered in the books of the Company as on the book closure date.

FINANCE

During the year the Company raised a net amount of Rs. 300 crores by way of long term Debentures and foreign currency loans. The amounts were raised at competitive rates for Capital expenditure, long term working capital, repayment of high cost debt and general corporate purposes, including

payments under voluntary retirement scheme of the Company.

The Company, taking advantage of the lower interest rate scenario, repaid high cost loans/debentures, and also re-negotiated with debenture holders/term lenders, interest rates on high cost debentures and loans aggregating Rs. 140 crores.

Continuing its initiatives, during the period under review, the Company saved on input cost by negotiating, with certain companies that have set up wind mills, for transfer of sales tax incentives in line with Government of Maharashtra's guidelines in this regard.

Credit Rating Information Services of India Ltd. has revised the credit rating assigned to the Company's outstanding debentures to "AA" from "AA+". The revised rating indicates high safety on timely payment of interest and principal. Fitch Ratings India Private Limited has recently revised the rating assigned by it to the Company's outstanding debentures from "AAA" to "AA+". This rating indicates high credit quality. The risk factors are negligible. The rating revision was on account of a sharper than anticipated decline in the tractor sales volumes and continuing sluggishness of utility vehicle volumes.

The Consortium of bankers continues to rate the Company as a Prime customer and extends facilities at prime lending rates. The Company further expanded its IT based payments solutions and has also widened the various initiatives in channel management by making available structured finance products and web enabled payment system through banks.

SCHEME OF ARRANGEMENT

During the year, as a part of a comprehensive review by the Company of the operations and businesses of its subsidiaries, and with a view to rationalising the structure of the group holdings in a manner that would result in greater shareholder value through elimination of administrative and financial inefficiencies, three wholly owned subsidiaries, viz. e-Mahindra Solutions Limited, Mahindra Auto Specialities Limited and Mahindra Alternative Technologies Limited were amalgamated with the Company with effect from 31st March, 2002. The amalgamation was approved by the High Court of Judicature at Bombay. In the process of amalgamation, investments held by the amalgamating companies have been restated at their respective net asset values. The surplus of Rs. 103.57 crores that has arisen on restatement of investments has been utilised to provide for diminution in value of certain

long term investments and related assets of the Company, the balance of surplus being retained as "Investment Fluctuation Reserve". As an integral part of the Scheme, the Company has netted off Deferred Revenue Expenditure of Rs. 469.97 crores incurred by the Company mainly on account of Special payments/pensions under voluntary retirement schemes, Development Expenditure, Fee for use of Technology etc. against Share Premium Account of the Company.

STOCK OPTIONS

Pursuant to the approval of the shareholders at the Annual General Meeting of the Company held on 31st July, 2000, the Company has allotted 55,24,219 Equity Shares of Rs. 10 each for cash at a premium of Rs. 49 per share to the Mahindra & Mahindra Employees' Stock Option Trust, to be held for the benefit of the Eligible Employees under the Mahindra & Mahindra Limited Employees' Stock Option Scheme. On the recommendation of the Remuneration/Compensation Committee, the Trustees of the Mahindra & Mahindra Employees' Stock Option Trust have granted 5,60,000 Options to Senior Managerial Personnel and 14,18,016 Options to other Eligible Employees during the year under review. Details required to be provided under the Securities and Exchange Board of India (Employees Stock Options Scheme and Employees Stock Purchase Scheme) Guidelines, 1999 are set out in Annexure I to this Report.

INDUSTRIAL RELATIONS

Industrial Relations have generally remained cordial throughout the year. The Management Discussion and Analysis gives an overview of the developments in Human Resources/Industrial Relations during the year.

In a major restructuring exercise to rightsize the workforce, the Company has, during the year under review, successfully implemented Voluntary Retirement Schemes covering Officers, workmen and staff. 2,788 employees have opted for voluntary retirement during the year under review. These measures will enable the Company obtain optimum utilisation of the existing labour force and increase the level of their productivity.
