Opportunities and Threats

As mentioned above, the growth of metal industry is linked to the growth of the major engineering and electrical applications industry, i.e. the Automobile / Engineering / Railways. Demand growth in Non-Ferrous Metal industries will largely depend on growth of the original equipment manufacturers (OEM) in the automobile industry, engineering & electrical segment and opportunities in the international markets. The demand for MSL's growth will heavily depend on the growth in served industrial Engineering and Electrical industries business both in domestic and international markets.

The growth in demand for Non-Ferrous Metals will depend on the growth of Industrial and infrastructural activities. Liberalization of industrial policy, WTO driven reductions in duty structure, growth in demand in export markets, and increasing demand for industrial products may result in an increase in demand for large Non-Ferrous Metals.

Segment wise performance
