MANAGEMENT DISCUSSION AND ANALYSIS REPORT**Industry Structure and Development**

Your Company is executing the construction contract secured by it. Further, the Company is looking for various other opportunities in projects and infrastructure development.

The year 2008-09 was a challenging year across all sectors because of the global economic meltdown. It impacted the Indian economy as a whole and the Real Estate and Infrastructure Sectors in Particular. The estimated GDP growth for the year 2008-09 was 6.7% against an average growth rate of 9% in the previous years (Source-Budget document). The demand for Commercial and Residential Real Estate fell sharply across India.

However the Indian growth story has not halted but slowed down initially. The government has intervened at the right time to provide a much needed boost to the economy in the form of fiscal stimulus packages. There is renewed focus on the Infrastructure Sector, especially Rural and Urban Infrastructure, Roads and Power segments. With the economy showing signs of stabilizing, the commercial and retail segments of Real Estate is expected to pick up in the coming months. This indicates the tremendous growth opportunities for the Construction, Project and Infrastructure Sectors in the next few years.

Business Overview

Despite slowdown in the economy, developing countries still have vast infrastructure needs. India is not an exception and has to concentrate more on Infra developments – a fact acknowledged by the latest Budget. The Five Year Plan envisaged a quantum leap in allocating the infra development requirement with Public-Private-Participation and identified a total plan of over 5,00,000 Crores. The infrastructure activity is likely to centre on transport route developments like increasing the National Road Network, Widening existing roads, and developing rural networks as well as on building new National Waterways like Ports, Fishing Harbours, Ship Repair Facilities and of course, the Power Sector.

Outlook

Your directors expect the current year would be further improving its financial performance. Looking at the opportunities available in the sector, your company is confident of securing further project for itself. Your Directors are confident that, your company would be able to bag new contracts and generate good turnover & income. Your Company is committed to enhance shareholders wealth.

Opportunities

Government of India has permitted 100% FDI into Infrastructure projects in India. That gives better scope for raising the money for the Company. Even raising of debt from international market is liberalized for the sector in which Company is engaged.

The rapid urbanization driven by increased rail, road and air connectivity has opened up lot of scope for construction and infrastructural development including development in suburban and Tier II cities.

The Company is engaged in infrastructural development which centre of attention for the new five year plan and current union budget.

Threats

The Company's business, which is mostly of contracts, execution of projects are affected by number of challenges including delay in execution, increase in cost of inputs, labour issue and other inherent business risk affecting the profitability of projects. Accordingly, company considers risk identification, monitoring and managing as most important. The company has control mechanism to ensure timely information availability and proactive risk management approach. The risk identified by the clients which might have impact on the project and having cascading effect on the Company's business is thoroughly examined and action taken accordingly.

Further, increase in the competition, increase in the labour costs and raw materials, increases in insurance premium and changes in laws and
