Mavens Biotech Ltd.

Dear Shareholder,

It gives me great pleasure to present the Annual Report for the year 2007-2008. As you would have noticed, your company is reporting good results for the year. Your company has witnessed growth in both the tissue culture and bioinformatics businesses.

Our plant tissue culture division provides cutting-edge services in micro-propagation of plants, mass multiplication of elite varieties and contract production of client specific plant varieties. Our agri bioinformatics centre develops analytical applications that sorts and organize the genetic data and systems that help store and distribute the collected information.

Since July 2007, global sentiment has weakened considerably. Due to record high crude prices, rising inflation and slackening of industrial production in India the macro economic situation has changed. Despite these external factors, we have posted good results as the strength of our business model and diversified revenue stream has helped us to maintain our growth rates.

We are committed to investing across our businesses with an eye on the future. We have managed, in a relatively short period of time, to build a well diversified business model and we will continue to expand our current and new operations. There are challenges, to be sure, in meeting our goals, but we are confident that we have the people, the strategy, and the resources necessary to make our future even brighter than our past.

Going forward, our emphasis on innovation, knowledge, increasing employee ownership, diversification of business lines and strengthening newly incubated businesses will help us in creating a leadership position in the industry.

We know that our employees are our most important resource and the key to the company's future. We stand dedicated towards their development and technical know-how and are investing money and management attention in our people.

The outlook for the year ahead is very promising. We have outlined a clear strategy for expanding our capacity aggressively by acquiring existing tissue culture units and bio fertilizer units. I am sure that all our strategies, initiatives and acquisitions will enable us to build a strong growth platform towards becoming a leading plant biotechnology company.

I take this opportunity to thank all our employees without whom these results would not have been possible. I also express gratitude towards all our consumers, suppliers and other business associates. To conclude, I would like to thank all our stakeholders for their constant support and encouragement, without whom we would not have reached where we are today.

B. K. Sah
Whole Time Director
