The shortfall in Turnover and profitability is due to slow progress of the company with respect to complete shoes and the commercial production from the Expansion Project was also delayed. The Company has also experienced wide fluctuations in Exchange Rates of DM during the year under consideration resulting into low turnover and profitability.

The figures of Net Profit of Rs. 16.35 lacs is arrived at after calculating the depreciation on Single Shift basis as per Straight Line Method as prescribed in Schedule XIV of the Companies (Amendment) Act, 1988. However upto last year company was following written down value method for depreciation. The change in Method of depreciation is mainly on consideration of company's acquiring substantial value of Fixed Assets during the year due to Expansion of Complete Shoe Project. This change in method of accounting mainly adopted to spread over the time the high burden of depreciation in initial years. The Profit and Fixed Assets of the company is overstated to this extent and the same is also qualified by the Auditors in their Report.

The investments of the Company pertains to Equity Shares of premium Financial Institution of India, i.e., The Industrial Development Bank of India. The loss in value of Rs. 1.26 lacs is considered very temporary by the Company due to which no provision is created in the Books of Accounts. The same is also qualified by the Auditors in their Report.
