ANNEXURE TO DIRECTORS' REPORT

MANAGEMENT DISCUSSION & ANALYSIS

Industry Overview :

The Healthcare Industry in India is expanding even as it is being transformed by the growing demand for quality healthcare from the increasingly affluent middleclass, the entry of large private groups, the use of the advanced technology and equipment and the availability of insurance.

Increasing participation by the Private Sector in healthcare services is bringing change in the Indian Healthcare Industry. The clinical Diagnostic Industry is experiencing rapid technological developments. New test parameters are being introduced to diagnose the problems more accurately. It is observed from the operation of Diagnostic Laboratories in India that they have low profitability as most of them are restricted to routine laboratory tests due to the low level of automation. Therefore, laboratories are trying to differentiate themselves by offering specialised tests such as drug services, therapeutic drug monitoring etc.

According to the report on Indian Medical Industry, India's overall expenditure on healthcare is comparable to most developing Countries. India's per capita healthcare expenditure is low due to its large billion plus population and low per capita income. This scenario is not likely to improve because of rising healthcare costs and India's ever growing population. However, there is ongoing government and private support to develop basic health Infrastructure.

Company's Performance :

To benefit from the growing market, your company has put in its best efforts to keep pace with the changed market scenario and in the process tapped corporates by providing healthcare services to their employees in terms of the Executive health check up, pre – employment check up etc. As Insurance Companies have entered into this area in a big way, your company has also tied up with various Insurance Companies to render their services to their customers. With all the above activities, your company is still regarded as one of the leading service provider in this field. The turnover and profit (before prior year's adjustments and tax) during the year was Rs. 1315.93 lacs and Rs. 50.12 lacs respectively.

Risk Management:

Risk of the Company has been identified and thoroughly analyzed. Continuous efforts are being put in to analyze and then take corrective measures to combat the various risks and uncertainties, such as coming up of small Diagnostic Centres

without any proper background. Underpricing is a big factor in this field and your company is able to take proper measure to mitigate them without compromising the quality of services. The main objective of your company is to remain in the top slot in the diagnostic field and this can be achieved only through quality services and offering the same at affordable price.

Future outlook:

Efforts will be put to improve the quality of services to meet the demands and needs of various segments of our Customers in order to maintain our position in the present competitive market. Your Company has plans to explore the business opportunities in the corporate customers' segments with new strategies.

S W O T:

1. Efficient infrastructure, experienced man power with upgraded technology in Diagnostic Services under one roof.
2. Suitable health schemes under different packages are being designed to suit the people of different categories and segments.
3. The threat to the business of the Company is that many more Diagnostic Centers and the Hospitals attached with Diagnostic Services are coming up. However, the Company is having its own plans and strategies to combat the same.
