ANNEXURE TO DIRECTORS' REPORT

MANAGEMENT DISCUSSION & ANALYSIS

Industry Overview :

With the invention of latest technological developments, the 'Healthcare Industry' is catching up with other leading industries. The growth rate of the healthcare industry in India is almost at par with the pharmaceutical industry and the software industry of the country. The scope offered by the healthcare industry in India has not been fully tapped so far. Considering the large potential, the healthcare industry in India is reckoned to be the engine of the economy in the years to come.

India has already become an attractive global destination for medical tourism, clinical studies and research and development programmes. During the past few years, large number of domestic as well as international players have entered into this field in India. The players have seen massive growth potential and a chance to capitalize on their expansions plans, especially as the country experiences a rise in the incidence of life-style related diseases. A growing elderly population coupled with a rise in income levels also increases the demand for better medical facilities in the country. The rural healthcare sector is also on an upsurge.

As per the statistics released by the Department of Industrial Policy and promotion, the hospitals and diagnostic centres have received FDI worth US \$1.03 billion between April 2000 and April 2011.

It is quite evident from the above that Healthcare Industry trends manifest an upward growth but several areas need to be attended to, for enhancing healthcare services for the common man.

Company's Performance:

With the changes in the scenarios in the healthcare industry, strategies of marketing also need to be changed. Your Company's alert approach has always helped to remain unshaken as far as brand image is concerned. 'Quality' is a word, your Company always believes in and the same has never been compromised even when it was under margin pressure.

The turnover during the year 2010-11 has been better than the same of the previous year. During the year 2010-11 the total income was Rs. 1329.15 lacs and the loss after tax was Rs.22.38 lacs.

Risk Management:

No business can run without risk but it is very important to evaluate the risks periodically and constantly to remain conscious on the subject. Your company is quite vigilant and takes immediate and appropriate remedial action to overcome any shortcomings detected on the analysis of risks and uncertainties.

Future Outlook:

Diagnostic Services business is a niche in the healthcare market. Hospital business is different from diagnostic business and they do not fall in the same category. Your Company with past

more than two decade's experience understand this principle much ahead of others and that is the very reason that your company has remained bracketed in the top diagnostic centres' category for last quarter century and it will continue to do so.

S W O T:

1. Brand image is getting stronger every year.
2. Never die attitude, Strong and Quality marketing strategies, Need based upgradation of the equipment and other infrastructures and keeping pace with the changes are the strong points of your Company.
3. More new players without much experience and background are making the market crowded. Under pricing of the products in the market are pushing your Company to work under margin pressure.
