PERFORMANCE REVIEW

During the year under consideration the Company's turnover was Rs. 9054 lacs as against Rs. 8228 lacs in the corresponding previous year, showing a growth of more than 10%. The profit, however, dipped to Rs. 62 lacs as against Rs. 130 lacs in the previous year. The year under review witnessed an unprecedented surge in price of steel and zinc. Volatility in the prices further worsened the situation. Raw Material prices touched all time high and the increase could not be entirely passed on due to the volatility in prices on the one hand and long term commitments that the Company had with many of the customers on the other, resulting in the Company having to absorb most of the cost increase. This affected the bottomline adversely. The Company has registered a phenomenal volume growth of 133% in the H.R. Pickled Oiled Coils segment. The Galvanised Steel Tape business, once the mainstay of the Company, has been discontinued because of shrinking of the market to very low level making it uneconomical to continue the business.

PERSONNEL

Industrial relations remained cordial throughout the year. There is no employee who is in receipt of remuneration equivalent to or exceeding the amount prescribed u/s 217 (2A) of the Companies Act, 1956 read with the Companies (Particulars of Employees) Rules 1975 as amended.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE

The Company is engaged in the manufacture and sale of Cold Rolled Steel Strips, H.R. Pickled Oiled Coils/Strips, C.R. Flat Wire Strips, Galvanised Wire and Galvanised Strips. These products are used by a wide range of user industries such as Auto Components, Power Transmission Equipment, White Goods, Defence Equipment, Electrical Equipment etc.

OPPORTUNITIES AND THREATS

The products of the Company are used predominantly in the Auto Components and in Power Transmission (Cables) industries. With the Indian economy growing rapidly, huge investments in the power sector is expected and consequently a good demand for power cables is expected, which in turn will steer the Galvanised Wire sales of the Company.

RISKS AND CONCERNS

Volatility in Zinc prices is a cause of concern. Barring this, the Company is adequately geared to achieve its growth plan.

OUTLOOK

C.R.STRIPS & H.R.PICKLED OILED

C.R.Strips & H.R.Pickled Oiled Coils & Strips are mainly used in the Auto Components and White Goods sectors. With the economy growing and the income levels on the rise, the demand for automobiles and white goods will continue to be buoyant. The Company's products have wide acceptability in these segments and as such the outlook is promising.

GALVANISED WIRES

The eleventh five year plan envisages a huge investment of Rs. 700 billion in the power transmission sector. Of this about 10% is expected to be the outlay earmarked for power cables. This in turn would drive the demand for Galvanised Wire which are likely to be used in the increased laying of power cables for transmission. As such the future for Galvanised Wire holds out good promise.
