Operations

The consolidated turnover of the Company was Rs. 7.75 crores, which includes Rs. 7.41 crores from the subsidiary for a nine-month period.

MosChip USA

Your company had acquired NetMos Technology, Inc in July 2001 and it was subsequently renamed as MosChip Semiconductor Technology, USA. The company's revenue has grown from US \$ 1.54 million for the 12-month period ended June 2001 to US \$ 1.60 million in the 9-month period ended March 2002. The company had made a profit of US \$ 0.10 million during this period as against a loss of US \$ 0.40 million for the year ended June 2001.

The acquisition of MosChip, USA has enabled the Company to benefit from the foundry relationships. The subsidiary will also handle marketing and customer support for all the products developed by your Company. Since the existing customer base of MosChip, USA will also be the target

customers for your Company's products, the customer acceptance and design-in phase is expected to be shortened considerably.

MosChip India

As you are aware, the company is transitioning from chip design to product development. This has resulted in a drop in the operating revenues of your company from Rs. 1.96 crores to Rs. 0.34 crores in the current year. Five products should have been released in the last quarter of the year under review. However, due to certain external dependencies, the launch of these products was delayed, affecting our performance to a certain extent.

Dividend

Your company has not declared any dividend during the period under review.

Increase in Share Capital

During the year under review, your company has made the following allotments:

8,325,770 equity shares to the members of NetMos Technology Inc. USA as a consideration for its acquisition on stock swap basis in the ratio of 16 shares of MosChip for 31 shares of NetMos.

In view of these, the total outstanding paid-up equity share capital of the company has increased from 10,500,000 shares during the previous year to 18,825,770 shares in the year under review.

Marketing and Distribution

With several products to be launched in the next few quarters, marketing and distribution will be the key factor to Company's success. The Company has further expanded the distribution network to Austria, Israel and Japan and had appointed a senior sales manager to look after the US markets. The Company is also planning to engage a full time marketing person in Taiwan, which is the largest market for the products of your Company.

Your company now has adequate presence in all the major markets for its semiconductor products. The distributors introduce the products of your company to their customers base, and generally buy and stock these products for reselling to end-customers in smaller volumes.

Qualification on the accounts and Boards clarification

Pursuant to the provisions of Sub-Section (3) of Section 217 of Companies Act, 1956, qualification of auditors in their report dated 26th June 2002 on the accounts of the company and Board's clarification on the same are furnished below:

Qualification in Auditors Report

The company has made an investment of Rs.30,92,19,018/-

in its wholly owned unlisted subsidiary company MosChip Semiconductor Technology, USA (Formerly NetMos Technology Inc. USA). The investment is being carried at cost. The difference between the investment amount of Rs.30,92,19,098/- and the networth amount of Rs.1,96,89,678/- of MosChip Semiconductor Technology, USA, at book value, as on 31st March 2002 has not been charged to the Profit and Loss account.

Board's clarification

The Board is of the opinion that the difference between the investment amount and the networth amount of MosChip Semiconductor Technology, USA, at book value, as on 31st March 2002 is not a reflection in the diminution of the value of the investment. The fair market value of MosChip USA, which is based on expected future cash flows over several years and other tangible assets (intellectual property developed and owned by it, the international distribution network, customer base, foundry relationships, etc.), is much higher than its networth at book value. The book value does not capture the real intrinsic worth of an investment. The decline in fair market value of investment in MosChip USA, if any, is temporary in nature and hence no provision has been made in the books of accounts.

Conservation of energy, research and development, technology absorption, foreign exchange earnings and outgo
