Within cash, the delivery volumes were down 1% YoY and delivery's proportion within market volumes dipped from 2.7% to 2.3%. However, there was a spurt in delivery volumes during the months of September, October, December and January coinciding with the trends in FII inflows. Our overall equity market share declined from 1.9% to 1.5% on a YoY basis. As on 31st March, 2013, total client base has increased to 773,716 while Pan-India distribution reach stood at 1,484 business locations across 527 cities. Despite challenging market conditions, we remain committed to building a strong broking franchise and our efforts were recognized at several industry platforms where we were ranked the best equity broker.
- Investment banking fees fell by 10.87% to ₹ 78.01 million this year. Fee income was impacted due to delays in closure of few deals which are in advanced stages. Future Outlook

Indian Stock Markets had a mixed year in 2012-13. Multiple headwinds like inflation, volatile commodity prices, slowdown in the investment cycle, policy slowdown, depreciating Rupee impacted corporate performance and earnings visibility. However, newsflow in the second half of the year like moderation in Wholesale Price Index due to easing in commodity prices and some action on reforms created positive triggers. As inflation stability sustains and liquidity improves, it can lead to further monetary

Directors' Report

easing which should eventually help to lower the cost of borrowing and revive the investment cycle. At our end, we are building-up all our businesses relentlessly, in such a way that we are ready to en-cash on any up-turn in the market.
