ANNEXURE TO DIRECTORS' REPORT

A. MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE AND DEVELOPMENT:

Glass Lined Equipment, Lead and Lead Alloys and Wind Energy are the three main divisions of the Company. The Glass Lined Equipment is primarily used in Pharmaceutical, specialty chemicals, agro chemicals and other processing industries. Lead and Lead Alloys are mainly supplied to Ordnance Factories (Ministry of Defence), battery industry, plastic stabilizers and metal oxide manufacturers. Wind energy generated is sold to APTRANSCO.

SEGMENT-WISE PERFORMANCE:

The operational and financial performance of the three segments are as follows:

(Rs.in lakhs)

SEGMENT	TURNOVER	PROFIT BEFORE INTEREST & TAX
Glass Lining	1995.67	184.28
Lead	1044.21	(75.45)
Wind Energy	92.88	70.46

OUTLOOK:

For the Glass Lining unit, the Company has an order book position of Rs. 511.53 lakhs as on April 01, 2003 as against Rs. 246.02 lakhs on April 01, 2002. The market demand for Glass Lined equipment industry continues to be promising and your Company expects to maintain the improved market share. The bulk drug manufacturing industry, one of the major customers for Glass Lined equipment has grown substantially over the last 2-3 years and is expected to maintain the growth rate given the investments by the big players of the bulk drug industries. Your Company has established a name for itself as a quality supplier.

While the market demand for Lead and Lead Alloys is substantial, the volatility in the prices of Pure Lead is of concern. India imports more than 75,000 tons of Lead and Lead Alloys every year to meet the requirements of batteries, plastic stabilizers and other consumer industries in the metal and alloys. Your Company has taken steps to identify alternative sources of raw material to bring down the cost of production.

OPPORTUNITIES AND THREATS:

In the Glass Lining industry, the growth and demand from the bulk drug manufacturers, a sector, which has shown the best performance in the Indian industrial scenario, continues to be an opportunity to exploit. Substantial investments for new projects indicate a promising opportunity for the Glass Lining industry. Exports of Glass Lined equipment is one area which has not been sufficiently exploited and the trend of exports of your Company over the last 2 years does indicate an opportunity, it would like to encash based on the feedback received from the customers on the quality of the equipment supplied by the Company.

In the case of Lead and Lead Alloy industry, the domestic demand is an opportunity that can be exploited to obtain higher volumes in operation. The Ordnance Factories and other customers have identified your Company as a reliable and quality supplier and the new product enquiries from them are welcome indications to the future opportunities.

Since the major customers are in the pharmaceutical and bulk drug industries, Government policy affecting pharmaceutical, bulk drug and even agro chemical industries affect the Company's prospects. Since the export of Glass Lined equipment requires obtaining export licence from the DGFT as Glass Lined equipment is identified under "SCOMET", licencing requirements, Government policies and delays in issue of licence
