INDUSTRY SCENARIO

Textile industry is one of the largest industries in India. It is the second largest industry in terms of providing employment opportunities to more than 45 million people in the country. India is the world's second-largest exporter of textiles and apparels, with a massive raw material and manufacturing base. The textile industry is a significant contributor to the economy, both in terms of its domestic share and exports. The Textile Industry contributes about 7 % to industry output, 2% to the GDP and 15 % to the country's total exports earnings.

The failure of the monsoon during sept-18 adversely impacted the crop of cotton for the season 2018-19. This has eroded the traditional pricing advantage of local raw material to the industry during the year.

The GST is fully implemented and should improve the ease of business and overall growth is expected in the years ahead.

FUTURE PROSPECTS

The growth drivers of the Indian economy are strongly in place. The economy is growing, we have young population, increasing penetration of organized retail, increasing aspirational consumption. Thus the demand for the Textile Industry is expected to keep a healthy rate of growth
