FINANCIAL HIGHLIGHTS AND OPERATIONS

Income from operations during the financial year ended 31st March 2013 was at Rs 13770.29 Lacs as against Rs 12391.53 Lacs representing an increase of approximately 11% over the previous year. Profit after Tax for the year under review amounted to Rs 1174.56 Lacs as against Rs 1059.84 Lacs in the previous year representing an increase of 10.82%. The increase in profits during the year under review was on account of improved product mix, operational efficiencies resulting in increased sales, reduction in input & interest costs.

NEW PRODUCTS

Technological up-gradation remains a continual process at the NBIL, in cotton, for example, in addition to stacking GM traits for bollworm protection, we are on the constant lookout for novel germplasm resources for imparting / enhancing resistance / tolerance against some of the notorious sucking pests, as also dehydration-stress (drought). Big Boll size (for reduced labor and ease in picking) and excellent re-flushing abilities are the additional novelties (our new Bt-Cotton products (for Central and South Zone) are almost invariably carrying). Jagannath-2 (mainly for irrigated high-management areas) as well as Arjun-21 (mainly recommended for the Rain-fed cotton ecosystems), the two frontline NBIL products, have proved themselves to be second to non.

Our recent R & D Bajra product, appropriately named Big-B (NBC-1188) has been ranked among the top three Bajra products sold in Rajasthan (2012) , the hot-bed of Bajra competitors, Local news papers are full of praise for the “Dark Horse” Big-B that emerged from the lower ranks last year (2011) to occupy a prestigious position in 2012.

Similarly in Maize after comprehensive trials and testing, NBIL's Singhum (NMH-02) was launched in 2011, true to its name, performance in the Full Season segment, Bihar in particular, has been outstanding. Two more single-cross hybrids (NMH-1008 and NMH-1007) are currently under intensive multi-location testing.

Rice remains our major crop and obviously involves very intensive R & D activities. “Tehelka” is new R & D product.

RESEARCH AND DEVELOPMENT

The company continues to provide substantial financial allocations to further strengthen its R & D programs. In fact, intensification of our R & D infrastructure (men and materials, all over the country) was the largest in any single financial year (2011 – 12), thus far. The competitive environment in the area of hybrid seeds is rapidly growing worldwide, so also in our country as well.

It is no longer good enough to offer high yielding hybrid varieties to the Indian Farmers. It is now becoming a mandatory requirement that such hybrids carry additional built-in value through seed embedded technologies / genes providing durable protection against specific diseases, pests and vagaries of nature (floods/ drought / heat stress etc.).

Seeds endowed with multiple value additions, in addition to high yield potential, are much in demand and eagerly sought after by the modern Indian Farmers. At NBIL, your Company has undertaken specific initiatives of reaching out even to the rain-fed and largely un-reached farmers. This is in congruence with our national priorities and commitments, as also in harmony with finding newer areas of opportunities for business. NBIL is pursuing both Genetic Engineering Technologies as well as Molecular-Aided Selection systems to enrich our crop breeding and product development programs.

INTERNATIONAL R&D COLLABORATIONS:

Nath Bio-Genes, jointly with its sister concern Global Transgenes Ltd., have signed agreements for R & D collaboration and commercialization thereof, of Fusion-Bt. Cotton technology, with specific partners in Pakistan and Philippines. Due processes of trans-boundary regulations, in accordance to the provisions of the Cartgena Protocol, have been followed strictly for transfer of Fusion-Bt. Embedded cotton seeds. During 2011 permission was granted, by the Government of Pakistan for conducting Large Scale Trial of some of the NBIL Bt. Cotton hybrids in Pakistan.

Based on the impressive results of trial, the Bio-safety Authority of the Philippines have granted permission for Multi Location Trials to be conducted in 2012-13. These MLTs are currently in progress in Southern Philippines.
