The company has achieved a turnover of Rs. 2707.84 Lacs against the turnover of Rs. 2999 Lacs of the previous year. The corresponding net profit for the year is Rs. 310.59 Lacs.

Review of Operations

Your company decided to take advantage of the announcement made by the Prime Minister on 15th August, 2002 to implement a competitive program to accelerate "E-Governance" at all level in the Government operations. The Government is also realizing that public-private partnership for success of any E-governance project. It expected that such E-governance will improve efficiency & transparency in their operations and bring less bureaucracy, more accountability & openness. Hence, your company has decided to enter into this new area of business which means IT enablement of various Government to business (G2B) processes

During the year the company has also entered into services like **Back office operations, Call centres, Data Processing, Insurance claim processing, Pay roll, Revenue Accounting etc. for Banks and Financial Institutions, Health Care companies and Logistic Companies.** Our vision is to strengthen your company's image as an organization promoting IT Industry and make it the "Most Valued Company" for all it's stakeholders. The effect of this operation will be reflected in the current financial year.

An overview of performance in 2004 -**A. Financial Condition :-****1.Share Capital :-**

Sales (Rs. in Crores)

Critical accounting policies

Your company is following the critical accounting policies are defined as those that in our view are most important to the portrayal of the Company's financial condition and results and that are most demanding on our calls on judgment.

Our revenue is of two types namely - Product Revenue & Service Revenue.

Product Revenue which is recognized when there is persuasive evidence of a contract, the product has been delivered, the sales price is fixed or determinable to the customer once it has been shipped, and title and risk of loss has been transferred. If we are obligated to perform installation services and a portion of the sales consideration is payable only on the completion of installation services, then the entire revenue is deferred and recognized on the completion of the installation services.

Service Revenue is recognized when there is a persuasive evidence of a contract, the sales price is fixed or determinable, and collectibility is reasonably assured. Time-and-materials service contract revenue is recognized as the services are rendered. Revenue from fixed-price, fixed-timeframe contracts is recognized in accordance with percentage of completion method.

Revenue Arrangements with Multiple Deliverables

In revenue arrangements with multiple deliverables we allocate the total revenues to be earned under the arrangement among the various elements based on their relative fair values. We recognize revenues on the delivered products or services only if:-

1. The above product or service revenue recognition criteria are met.
2. Undelivered products or services are not essential to the functionality of the delivered products or services.
3. Payments for the delivered product or services is not contingent upon delivery of the remaining products or services, and
4. There is a evidence of the fair value for each of the delivered or the undelivered products or services.

Initiative for business process improvements

NetVista's core purpose is to "leverage information, knowledge and technology to enhance human endeavor through the intelligence and relevant application of technology/ knowledge in diverse situations." In line with this core purpose, we have embraced Six Sigma into our business to achieve excellence and optimize our strength to achieve our goals. We believe that quality is a culture, expressed in the way we interact, identify and cater to the needs of our customer, and in the products and services we deliver to them. The primary focus of every NetVistaite is on "Customers", as a continually satisfied customer is true foundation for profitability and global competitiveness. Six Sigma methodology is practiced at corporate, business and support units' level to deliver better value in our services in terms of size, schedule, and quality, growth of the organisation, both in terms of number of associates as well as range and depth of competencies.

The year witnessed significant progress in collaborating with leading technology and product vendors. This ensures that the Associates are kept abreast of the latest development in the technology landscape.

Knowledge Initiative

Business excellence does not come about without a strong basis in knowledge practices. Therefore, the ones who stay ahead in the new economy are those who acts upon this realisation and build their funds of knowledge. This business need let to the conceptions of Knowledge Initiative (KI) in your Company.

Knowledge Initiative(KI) is an organisation – wide initiative that endeavours to bridge the information and knowledge gap among technical Associates, project Managers, Account Managers, pre-sales team and business development Associates by building the necessary hard and soft infrastructure for effective knowledge capture and reused.

Key-Window, your Company's knowledge networking portal, along with a set of innovative delivery mechanism developed by KI, is proven frame work for sharing and leveraging the knowledge available within and outside the organisation.

Industrial Development and Business Prospects

Fiscal 2004 (current year) has been one of the significant year in the history of the Indian IT industry. The year witnessed the treat of geo political issues, which had in the past years impacted business prospects as well as emergence of early indicators of improvement in global economic environment. Both these events augur well for the growth of the Indian IT services industry.

Customers are viewing IT services providers from a strategic perspective, thus enabling them to align and leverage IT strongly with their business objectives. During the year, there was an enhanced interest by global corporation to leverage the compelling value proposition offered offshore outsourcing. This translated into a higher number of customer visits and greater CXO level interaction. A number of CIO surveys also indicated the revival of growth in technology spending and increasing allocation of budget towards offshore outsourcing. After witnessing negative growth rates in some of the service segment like IS consulting and custom application development, the global IT services market is poised to grow at a CAGR of 5.4% over the next 5 years.

The fact that offshore outsourcing is being increasingly accepted as a strategic imperative by more organisations today than ever before is translating into a healthy pipeline in terms of opportunities. Our customer base offers significant scope for expanding our share of their spend and is indicative of the potential for growth momentum. We have invested significant resources in Relationship Management skills to nurture and grow the customer relationship that we have. We shall continue to invest in sharpening our skills and processing in partnering with them in their journey towards business excellence.

The growing share of revenues in Europe and Asia Pacific reflect our enhanced global footprint. The presence of our offshore center in USA is expected to strengthen our North American operations. With India economy on high growth phase, there is a great promise of growth in the domestic IT spending also. This will further open up the growth avenues for the IT industries.

Any regulatory measure, explicit or otherwise, introduced in our major markets as a response to the backlash again offshore outsourcing could impact our business.

Business Process Outsourcing continues to offer great promise. This segment is witnessing consolidation in India and also renewed confidence of MNCs in their captive units. The consolidation will bring about the required scale of operation making the industry mature and stable. NetVista's strategy of offering integrated solutions by bundling BPO service with IT services to customers is seeing in early signs of success. There are clear customer relationship synergies for the Indian IT companies to provide BPO services.

Revenues based on Geography :
