ECONOMIC SCENARIO

The world economy has been passing through stress. Financial turmoil in Europe has affected other countries. This contagion has pushed up borrowing cost and slowed growth in many parts of the world, and capital flows to developing countries have fallen. As a result, and despite a strengthening of activity in the United States and Japan, world trade has slowed down. Under this scenario the forecast for global economic growth has been revised downward to about 2.5% in 2012. Indian economy also slowed down in 2011-12 mainly due to weak industrial growth. Inflation remained a major concern constraining RBI to pursue tight monetary policy. 2012 has started with widespread concerns of another global recession. Equity market valuation in terms of price earnings ratios in all big markets is not far from low levels seen during financial crisis of 2008/2009. Fears of the crisis moving to Asia as well due to a housing collapse in China have intensified. Sentiment is not far from lows seen at start of 2009, when markets feared a depression following collapse of Lehman Brothers in late 2008. Volatile prices of index stocks have caused a fear in the minds of FIIs and domestic investors that lead to outflow of funds by FIIs. Hikes in the interest rates by the Reserve Bank to curtail inflation has affected Industrial growth and also been viewed negatively by the market resulting in sharp volatility in the financial market.
