MANAGEMENT DISCUSSION AND ANALYSIS

Omansh Enterprises Limited (also referred to as 'OMANSH' or 'the Company') is a growing company engaged in Trading of Steel and Electrical Products in Delhi & NCR. 'OMANSH' is under the management control of the promoters having a rich experience in marketing and other key management disciplines specialize in providing value products to our customers.

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1956, guidelines issued by the Securities and Exchange Board of India (SEBI) and the Generally Accepted Accounting Principles (GAAP) in India. Our Management accepts responsibility for the integrity and objectivity of these financial statements, as well as for the various estimates and judgments used therein. The estimates and judgments relating to the financial statements have been made on a prudent and reasonable basis, so that the financial statements reflect in a true and fair manner the form and substance of transactions, and reasonably present our state of affairs, profits and cash flows for the year.

I. OVERVIEW OF THE ECONOMY

India's GDP growth peaked at 9.3% in FY11 and has dropped sequentially since then to 6.3% in 2012 and to 4.5% in FY13. Growth appears to have bottomed out at 4.4% in Q1 FY14, and GDP growth has since risen to 4.8% in Q2 FY14, and 4.7% in Q3 FY14.

At this juncture, economic indicators point to a revival of growth as challenges such as the steep current account deficit, tight liquidity and high food inflation have ebbed. Further, measures have been taken by the government to expedite project clearances and boost Capital Expenditure expansion.

II. INDUSTRY STRUCTURE AND DEVELOPMENTS

After a period of 5 years, since the break out of the global financial crisis and with significant liquidity injection by several large economies, the macro data from the developed economies started showing trends of slow improvement during 2013 even though several structural weaknesses still needs to be addressed before these trends can be considered sustainable. Global growth remains below pre-crisis levels and much weaker than during the rebound that took place in 2010 and 2011.

In 2013, growth in emerging markets slowed down due to weak demand especially in developed countries and tighter financial conditions. India

remains a bright spot in the global steel industry and is one of the largest crude steel producer. The World crude steel production rose by 3.5% to 1.607 billion tonnes in the year 2013.

The economic recovery therefore remains fragile due to divergent underlying supply demand conditions across different regions. Despite some signs of recovery in global steel demand, continued volatility and uncertainty make it a challenging environment for steel companies.

In 2013, India remained the 4th largest steel producing country in the world, India's GDP growth has slowed down to 5% in 2013 on account of rising inflation and tight monetary controls. This has led to weak domestic steel demand, which grew by 3.3% in 2013 inspite of rise in demand in the last quarter. This has resulted in India becoming the net exporter of steel in Financial Year 2013-14 after a gap of six years.

III. OPPORTUNITIES AND THREATS

The Indian economy is expected to witness steady economic recovery in the medium term on the back of reforms, industrialisation and growing urbanisation.

OMANSH aims to address risks, opportunities and threats posed by its business environment strategically by maintaining sustainable and robust business models and further improving on them. Omansh's response to these elements is discussed in the sections below.

1. Macro Environment

The financial performance is influenced by the economic climate in India. The steel consumption growth in India has been relatively resilient, slowing economic growth has meant a moderation in steel consumption growth rates. Despite the challenging economic conditions, Omansh has consistently and profitably grown its volumes across customer segments by enhancing its participation across value chains through innovation-led changes in service and solution, new brands, shaping channels, diversifying and deepening the customer base, entering new segments and aggressively implementing several cost reduction initiatives.

2. Industry Cyclicality

The steel industry is subject to cyclical swings arising from factors such as excess capacity, regional demand & supply imbalances and volatile swings in market demand and prices, more recently
