OPERATIONS

During the year under review, your company produced 31063 MT of Acrylic Fibre (ASF) as against 32093 MT during the previous financial year, achieving 103% average capacity utilisation. During the year, Sales of the product of your company has been to 30596 MT of Acrylic Fibre against 32026 MT during the last financial year. The Production and sales are marginally lower due to drop in exports. The turn over has been down to Rs.294 Crores as against Rs.320 Crores in the previous year. The year under review witnessed abnormal increase in cost of main raw materials i.e ACN by more than 20% due to continue spurt in crude oil prices and various external factors. Though Government reduced custom duty from 10% to 5% w.e.f.,01.07.2005 but the rise was so sharp, that it only has nominal effect. The rise in raw material prices and other input cost could not be passed on to market causing melancholy in margins.

In the recent budget, the excise duty on acrylic fibre reduced to 8%, whereas the excise duty on raw material kept unchanged at 16%. The Government also imposed 4% additional custom duty, thus effectively the company is paying 22% custom duty while it can adjust only 8% duty on output. This has resulted in an inverted duty structure for the Company resulting into accumulation of Cenvat credit, causing strain on cash flow. The Company has made several representation both directly and through various Chambers to the Ministry of Finance for the correction of this anomaly, but Government's response is yet awaited.

CURRENT YEAR'S OUTLOOK

Though the rise in A C N Prices is continuing, but the Fibre Prices is also showing sign of improvement due to pick up in demand. It is expected that in the course of the year the market will further look up. The Crude Oil is also seems to be settling down at 70 dollar a barrel, which would help in stabilizing A C N Prices.
