MANAGEMENT DISCUSSION & ANALYSIS

Although Media industry in India is growing at a very healthy rate of about 15% CAGR, Animation film Industry continues to suffer and has negligible share in the total market. This is basically because the Animation Movies are still perceived to be Children's category in India. Foreign Animation film producers like Disney, Pixar and others are spending huge resources, which are 30 to 40 times the amount being spent by the Indian animation film producers. This makes the quality of Their Production far superior and the Indian Animation Film Industry is unable to compete with these high-quality films in the global market. In addition, substantial amount must be spent in promotion and prerelease activities for the animation films rendering them unviable.

With the advent of Cloud computing and availability of shared High cost Computer resources Individual animators and Small groups with necessary skills can produce special effects and computer graphics required for live action film industry at a very low cost making it not possible for the corporate to compete. Though quality and creativity are well appreciated by the media industry they are not well rewarded with revenues.

These aspects have been analyzed and The Management has decided to discontinue the production of animation films. The Management proposes to leverage its Brand Equity with outsourced Contents to build a resilient Business Model. The company is also in the process of entering Rights acquisition and Distribution of Live action films, with the objective reducing the turnaround period of resources and maximizing the revenue and profits. The company plans to enter streaming and broadcasting industry which are growing at a very rapid rate. The management is reasonably confident with this restructuring of the business model; they will be able to generate healthy revenue and profits with a sustained growth and bring back the Company to its past glory.
