(Rs. in Lacs)

Particulars	Projected in the Prospectus 96-97	
Turnover	5152.68	2524.00
Net Profit	951.01	7.51

The company could not achieve the projected profitability due to following reasons:-

- The Turnover upto the projected level could not be achieved due to low production during the crushing season 1995-96.
- 2. High cost of carrying Inventory and lower sugar recovery.

Future Outlook

In the recent years the Indian Sugar Industry has gone through tremendous changes. During the crushing season 1995-96, India produced a record production of 163 lac tonnes of sugar and there is a fall of production in the crushing season 1996-97 to 128 lac tonnes. Due to fall in production, the prices of sugar are in rising trend as compared to the prices of previous year. The rise in price will improve the profitability of the company.
