**Review of Operations**

During the crushing season 1998-99 which commenced from 20/11/98 and closed on 10/02/99, the mill crushed 20,14,475 quintals of sugarcane and produced 1,71,634 bags of sugar at an average recovery of 8.52%. This year the mill witnessed floods, late rains, fog and bad weather which had an adverse impact both on the availability of Sugar cane & recovery. Most of the sugar mills in the vicinity of your mill either could not start the crushing operations or could not crush the Sugar Cane upto their crushing Capacity.

The Northern States have recorded lower production owing to negative impact of weather conditions, whereas Maharashtra & Southern States have recorded an increase in production.

**Industry Overview**

The production of Sugar for the 1998-1999 will be around 150 to 155 tonnes as compared to the production 128 tonnes of the previous year. The country has adequate production of Sugar & buffer stocks to meet the domestic demand of sugar which is expected to be around 150 lacs tonnes. Despite sufficient availability of sugar domestically, imported sugar continues to arrive in the internal market. The Government has fixed import duties on the imported sugar, but still they are lowest in the world & appropriate steps are required to be taken for restricting the imports of Sugar.

**Outlook of Future**

Your Company expects that reverse cycle regarding decline in produce of Sugar Cane and adverse climatic conditions will cease in the crushing season 1999-2000, thereby leading to improvement in terms of recovery & supply of Sugar Cane. Moreover Massive Cane Development Programme will also ensure the timely crushing & sufficient supply of Sugarcane.
