Letter to Shareholders

Dear Shareholders,

2008-09 was a year of consolidation and preparing for the future of our Company.

Our Gear Cutting Machine Tool Business declined nearly 40% this year. This equipment is mostly purchased by the auto and auto component industry that were the worst affected by India's economic slowdown.

However, our Company's experience and expertise in large, specialized machine tools for heavy engineering applications enabled us to more than make up this loss with orders from public sector enterprises and large private sector companies. This sector continues to show robust potential this year and our product mix will be nearly 90% in non-auto related heavy machines driven by the substantial investment and modernization plans of the railways, defence and public sector.

Our Machine Tool division's Rs.100 crore expansion and modernization program has been mostly completed and this should yield a nearly 400% productivity increase while reducing factory through-put time by nearly 50%.

Our Engineering Business continues to show a robust 60% growth in sales and profitability. Although supplies to recession hit automotive clients like TATA Motors and Carraro declined during the year, this was more than made up by increased business from the wind energy sector.

We are currently working on several new projects with companies like BEML, Cummins and JCB for their complex engineering component requirements in the earth moving, power gen-set and metro rail sectors. This division should maintain its high growth during the current year, continuing to contribute significantly to our Company's bottom line.

Although our Vehicle Business could not progress in terms of sales and profits, it focused on product perfection and developing variants like ambulance, garbage tipper, school bus, CNG pickup truck etc. Our products are all well accepted by the market. The only deterrent now to increased volumes is the availability of vehicle finance.

This project retains its original low risk character, with a relatively small capital investment resulting in low break-even volumes. The Board and

Management remain vigilant to ensure that fresh investments, if any, in this project are made very judiciously.

Our Company's five year strategic vision varies for each of our Businesses.

As a large, reputed and established player in the Machine Tool business, coupled with our "state of the art" production facilities, we aim to soon become the industry leader in India and, in parallel, globalize the business through strategic acquisitions in USA or Europe.

The Engineering Business will continue to partner with blue chip clients moving up the value chain from commodity, automotive component production to providing highly complex, customized engineering solutions to the energy and infrastructure sectors. This will act as an entry barrier for competitors while improving our margins.

The Vehicle Business will focus on the light utility or non-passenger car segment because it needs less investment for frequent model changes, lesser advertising and promotion and does not directly compete with global car makers. We want to be a mid-volume, domestic, niche player. With its low capital investment and break even, this project can generate good profitability without needing large volumes.

My sincere appreciation to our shareholders, employees, suppliers, business associates and particularly our lenders: SBI, SICOM and HDFC who have consistently supported the Company.

Finally, on a personal note, our Company Chairman, and my father, Vinod Doshi's demise on 6.10.08 has left an irreplaceable void, for all of us, at Premier. His knowledge, experience, wisdom and unstinting support were invaluable in turning around the Company as well as motivating our entire team. We all miss him very much.

With regards,

Maitreya Doshi
Chairman
