**TEXTILE INDUSTRY:**

The over all performance of Industry during the year under review was affected badly due to lower realizations both in export as well as domestic market. This is mainly on account of currency fluctuations and lower demand due to recession in the Global Economy. While there is some improvement in the domestic market during the middle of the year, your company was unable to take the advantage as there was unexpected/unscheduled imposition of power cut to an extent of 40% coupled with unforeseen labour problems suddenly cropped whereby 25% of man power has to be reduced. These two major factors have hit the production drastically. In summary, company's

performance was adversely affected during the year due to combination of both external and internal factors.

**OUTLOOK ON OPPORTUNITIES, RISK AND CONCERN:**

The fundamental growth drivers of Indian economy remain strong despite the economic turmoil in the world. There would be growing opportunities in the international market as well as domestic market. The consumption is growing in response to growing per capita income, population and strong retail push. With regards to textiles, there are significant opportunities in the domestic market as more consumers are buying readymade garments and also consumption of the cloth per capita continues to increase due to growth in the economy which is adding to the purchasing power of the consumers.

Macroeconomic factors including rupee appreciation increase in interest rates are the major risk factors presently for the textile industry. If there is appreciation of rupee, then the competitiveness of industry vs. other countries will decrease. Since the products would be diverted to the domestic

market, the price realization will decrease even though there is growth in the domestic consumption. Increase in interest rates will effect the profitability, since the industry is capital intensive.

### EXPORTS:
