SICA 1985 & REVITALIZATION STRATEGY

The company has to file its reference with BIFR; as the company has become a sick industrial company within the meaning of clause (o) of sub-section (1) of section 3 of the SICA, 1985.

The members are aware that the polymer-bags business suffered because of impact of external factors i.e. overall industrial scenario in the segment. Despite of all efforts, the company could not run the operations profitability; hence the activities were meager and insignificant resulting into loss of opportunity, idle fixed assets, mounting of overheads and fixed costs leading to the losses and erosion of net worth.

The company is drawing its rehabilitation plan by diversifying into sunrise sector like information technology, entertainment and media. Besides the diversification, the company is working on options for revival of polymer bags business by having tie-ups for exports as well as job works. The Lea spring division is closed since 1996. As the operations did not remain viable at that point of time, instead of investing meager resources there, your directors are making efforts to dispose it off in consultation with the lender.

The road ahead is difficult but with sustained efforts, new tie-ups and diversification, your Directors are confident to bounce back in a time bound way.
