## **BUSINESS OUTLOOK**

### **CONSTRUCTION & INFRASTRUCTURE**

At the constant prices (2004-05) the construction sector showed a growth of 5.9 percent in 2012-13 compared to 5.6 percent growth in 2011-12. Opportunities for the constructions sector arise from investments in the infrastructure sector comprising transportation (development of roads, airports, ports and railways), energy (thermal and hydroelectric power), irrigation telecom, urban infrastructure and industrial capex (from sectors such as autos/auto-ancillaries, textiles, steel, cement and hydrocarbon).

Based on current announcements infrastructure spending in the XIIth five year plan (April 2013-18) is expected to be to the tune of USD 1 trillion assuming a construction intensity of 50-55% this theoretically translates into an opportunity of USD 500 billion for the construction industry over 2012-17.

The large planned investment in infrastructure would require significant capital mobilization and banks the dominant source of debt funding for infrastructure projects, would not be able to meet the sectors increasing requirements given their limitations related to sector/group exposure norms and asset –liability mismatches. Recent policy initiatives such as creation of infrastructure Dept Funds (IDFs) and the role of India Infrastructure Finance company Limited (IIFCL) are steps in the right direction to channelise long-term debt funds to the infrastructure sector.
