MANAGEMENT DISCUSSION & ANALYSIS

1. BUSINESS PERFORMANCE REVIEW:

The Company has made profits in the financial year 2011-12 after switching over to Entertainment and Media business. The Company and its subsidiaries have reported a top line of Rs.109 million and bottom line of Rs.9.67 million (Consolidated figures). Even during the previous year ended March 31, 2010, the company and its subsidiaries have reported a top line of Rs.82.2 million and bottom line of Rs.6.68 million demonstrating a turnaround in company's fortune, since 2009-10.

2. INDUSTRY STRUCTURE AND DEVELOPMENTS

Foray into Oil and Gas Environmental Services:

Recently, your Company has changed its primary business objective as Oil tech services business vide shareholders approval obtained on April 29, 2011.

Your Company has expanded its activities by entering into oil and natural gas environmental services after altering its main objects contained in the Memorandum of Association. Your Company has acquired 100% stake in an international company, Gemmia Worldwide S.A., by issue of Global Depository Receipts. The main assets of Gemmia Worldwide S.A., being 51% holding in Oil Tech Global Services (DBA), a group of companies engaged in oil sludge treatment, reservoir cleaning services and oilfield and refinery services and equipment sales to oil and gas companies with assets and operations in Russia, Switzerland and beyond.

Oil Tech ("OT") is a group of companies controlled by Gemmia Worldwide S.A. with assets in Russia specializing in processing & disposal of waste sludge from the oil & gas industry. The company has also recently introduced a new service for the automated cleaning of oil storage.

Crude oil lost due to past extraction practices and current inefficiencies and accidents along the petroleum value chain in emerging economies are becoming unacceptable due to increasingly stringent environmental regulations and the high price of oil. It is estimated that in Russia alone, 200 million cubic meters of oily waste can be processed to recover oil and eliminate the environmental hazards. Bringing proven technology to bear in emerging markets from countries with long histories of environmental remediation offers significant profit potential. Gemmia Worldwide has recognized this opportunity and moved to capitalize on it.

Gemmia companies have established supplier relationships with leading Russian petroleum companies, supplying a wide range of oilfield and refinery related equipment. On the back of these supply relationships, environmental services business has been built.

Gemmia is well positioned to build a world class environmental services business because:

- ☞ Russia is the largest oily waste market in the world, with an estimated 200 million cubic meters of sludge in place and a further production of 3.5 million cubic meters per year.
- ☞ The highest levels of the Russian government have recently signaled that environmental problems are to be dealt with and fines for pollution are expected to rise 3-4 times by 2016.
- ☞ The competition is highly fragmented in Russia with currently only 42 small undercapitalized environmental services providers (compared to 3500 environmental services providers in the United States)
- ☞ Gemmia has established supply relationships with large Russian petroleum companies which provide an entry that competitors do not have.
- ☞ Gemmia operates a state of the art 150,000 metric ton oily wastes capacity processing plant in Nefteyugansk, which is the first of at least 12 plants it intends to build over the next five years.

- ☞ Gemmia has an exclusivity agreement for Russia with a U.S. company, Tarmac Intl, the world's leading supplier of LTDD technology.
- ☞ Gemmia have exclusive rights for Supermax automated tank cleaning technology for all markets outside the US and Canada and will be soon manufacturing units with a conservative estimate of building 12 units in place over the next five years.
- ☞ Gemmia strikes business even outside Russia with a presence in Switzerland (a major center of oil trading), India, Indonesia and soon in other countries.

The Company

Gemmia Worldwide S.A. owns 51% in each of a group of affiliated companies known as Oil Tech Global Services (DBA) ("Oil Tech"). Oil Tech companies are engaged in the petroleum service and supply sector in Russia providing:

- o Environmental services for the petroleum industry
- o Oilfield and refinery equipment supply

The remaining 49% in each of the Oil Tech companies is controlled by Oil Tech management.

Vision and mission

Gemmia's vision is to become a world class provider of environmental services to the oil and gas industry focusing on high oil producing and consuming countries outside of the highly competitive North American and European markets, while continuing to generate significant cash flow from its oilfield equipment and services businesses.

Gemmia's mission is to increase shareholder value by applying proven cleantech methods to recover lost oil and energy currently polluting the environment and helping our clients to meet increasing stringent environmental regulations.

History

Oil Tech was formed in 2008 to supply the Russian oilfield equipment supply sector providing a wide range of equipment and services. In early 2010, Oil Tech management spotted the opportunity to supply environmental services to the oil and gas companies with whom Oil Tech had built supplier relationships. This resulted in the construction of a state of the art oily waste processing plant supplying services to Rosneft Yuganskneftegaz, with a second on order and advanced discussions with other customers underway. In 2011, Oil Tech added automated tank cleaning and environmental consulting services to their offerings.

Products and services

Environmental services for the petroleum industry

Gemmia provides environmental services to the petroleum industry including oily wastes treatment, automated tank cleaning and environmental consulting services. Oily wastes treatment includes oil recovery, drill cuttings treatment, sludge and oil contaminated soil remediation. Gemmia is moving into treatment of special situation wastes such as sulfuric acid tar sludge. Automated Storage Tank Cleaning recovers oil and remediates sludge in storage tanks. Consulting services include: Environmental health and safety (EHS) audits, Waste-management strategies design and implementation, Sustainability programs adoption, Ecological infrastructure EPC services and Environmental research and engineering.

Oily Waste Treatment

Gemmia employs a well tested oily wastes treatment method at its 150,000 metric ton capacity plant in West Siberia at Nefteyugansk, Khanty-Mansi commissioned in February, 2011. Tarmac Int. Inc., one of the leading providers of recycling solutions supplied the plant.
