3. Management Discussion and Analysis

a) Industry Structure, Developments and Segment-wise Performance

Your Company operates in single segment, viz., components for transportation industry. The growth within automobile industry was as follows:

Industry Segments	Growth in %	
	2010-2011	2009-2010
Passenger Cars	27	28
Utility Vehicles	17	24
Small Commercial Vehicles (One Ton & below)	36	8
Light Commercial Vehicles	22	77
Medium and Heavy Commercial Vehicles	38	30
Three Wheelers	29	25
Two Wheelers	27	25
Farm Tractors	22	27

Source : Society of Indian Automobile Manufacturers.

Domestic market continued its robust growth across all segments and this required ramping up capacity. The emphasis on capacity increase and improvement of delivery continued throughout the year.

Exports

In the export market, the increase in volumes from the later part of the year 2009- 2010 continued in the year 2010- 2011. Your Company met its export commitments.

The United States Dollar, a currency on which your Company's exports are mostly dependent was relatively stable. The strengthening of the rupee was marginal and such fluctuations were handled well with the Company's forex policy.

OEM and Aftermarket

Your company's performance in the OEM Segment continued to be very good and the growth over the previous year was 58%. The Company's aftermarket sales grew at a rate of 10% over the previous year.

b) Operational and Financial Performance

Sales and Operating Revenue grew by 29% compared to 23% in the previous year. This was lead by a very strong growth of 31% in the domestic market and 5% in export market. The PBT for the year under review was Rs.196.66 Million against Rs.149.33 Million in the previous year, a growth of 32% over last year. Higher input costs contained with cost control measures and improved operational efficiencies have resulted in achieving a healthy profitability.

c) Outlook

The Domestic Vehicle Industry is expected to continue its growth in the coming years in view of steady growth rate of our GDP, rising number of middle class and higher disposable income. Your company expects the aftermarket demand to remain steady. With the planned capacity addition the order fulfilments in this market are likely to improve. Export market particularly for brake linings & CV Brake Pads is showing healthy scope and your company is gearing up to improve the delivery to this market during the following year.

Prices of commodities like steel have already hardened and the cascading effect would impact on all commodity prices. Your company has already embarked on cost reduction initiatives along with appropriate recovery from the customers to offset the impact to a large extent. The increase in interest rates could cause an adverse impact on the demand for vehicles. Your Company's risk management measures are likely to adequately address these situations.

REPORT OF THE DIRECTORS (Contd.)

Focus on capacity utilisation, optimal cost structure, quality focus and productivity are the key areas your Company will focus to sustain and improve the high levels of performance. The contracts remaining to be executed on capital account will result in enhancement of our capacity to meet the customer demand.

d) Opportunities and Threats

India's process engineering skills applied to the redesigning of production processes, raw material availability, quality assurance and technically skilled manpower has provided a distinct global advantage of cost and quality. This has helped India becoming a major auto components outsourcing hub for several automobile manufacturers. This has provided your company an opportunity for accelerated growth.

Your company's preparedness in development of new products and meeting capacity requirements in time are key in realising the full benefits of the opportunity.

The main threats your Company is likely to face are:-

- increasing price pressure from OEMs from whom the major portion of the future growth is likely to come.
- increase in commodity prices arising out of natural calamities in Japan and Australia and political instability in certain parts of the world.
- Volume increase that requires ramp up of capacities in a short span of time, affecting profitable growth.
- dumping of Chinese products at a lower price.

The company does see increasing competition due to the attractiveness of the domestic market.

e) Internal Control Systems and Risk Management

An independent agency carries out internal audit of all the Company locations across the country. The Audit Committee of the Board approves the audit plan in the beginning of the financial year in consultation with the internal auditors, the statutory auditors and the operating management. The findings of the internal auditors are placed before the Audit Committee for review. The response of the operating management and counter measures proposed are discussed at the Audit Committee meetings. The process not only seeks to ensure the reliability of control systems and compliance with laws and regulations but also covers resource utilization and system efficacy.

Risk Management is an integral part of the business process. The Company has mapped the

risks at the business processes and enterprise levels and has evolved a risk management framework. Internal audit focuses on these risks at all sub-process levels. Mitigative measures have been put in place in respect of these risks. These would be periodically reviewed by the Board of Directors.
