OPERATIONS:

SUGAR

The following table gives the comparative figures of sugarcane crushed, sugar bags produced and the rate of recovery for the financial year under review and previous financial year.

	Current Year 2006-2007	Previous Year 2005-2006
Sugarcane crushed in MT	3,66,356	1,79,519
Sugar Bags Nos.	3,87,650	1,77,300
Recovery	10.58%	9.88%

Good monsoon in plantation areas improved the availability of sugarcane for the season 2006-07. The encouraging monsoon season and resultant increase in plantation areas is expected to further improve the availability of sugar cane for the season 2007-08. However the cost of sugarcane vis-à-vis sugar prices has been a cause of concern.

CANDY SUGAR:

The unhealthy competition from unorganized sector poses problems for candy sugar business. The company is taking steps to use the candy plant for production of high-grade sugar as in the past. Production of Candy sugar and Bura was Nil during the financial year.

CONFECTIONERY:

Production of confectionery was 2567 MT during the financial year under review as compared to the production of 2780 MT during the previous year. The Company concentrated on brands such as Pan Pasand, Mango Mood, Coffee Break, etc. These brands along with other traditional brands are receiving good response.

POLLUTION, ENVIRONMENT AND SAFETY:

Various equipments are installed as an anti-pollution measure for the protection of environment at your factory. The norms prescribed by the Government are also adhered to. Necessary industrial safety measures have also been taken at your factory, which has resulted in better protection of workers and no major accident has taken place in the factory.

ANNEXURE – A MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY – STRUCTURE AND DEVELOPMENT:

The Company is engaged in the manufacture of Sugar and various Confectionery Products. It has manufacturing facility at Ravalgaon (Maharashtra) and Corporate Office in Mumbai.

BUSINESS OUTLOOK:

Generally there has been increase in demand for sugar year to year, but availability of sugarcane varies on climatic conditions. The Sugar Industry in India is regulated by the Government and is dependent on a host of external forces. There is also a strong co-operative segment in the Sugar Industry.

As regards availability of sugarcane there has been improvement and further improvement is expected due to better monsoon and resultant increase in plantation areas. However the prices of sugar have been very unfavourable. The sales of confectionery division was affected by various factors like competition, increase in costs etc.

OPPORTUNITIES AND RISKS:

In view of the anticipation of continuous growth in the demand for the products of the Company, the Company is expected to have good opportunity to improve its performance. Efforts are made to improve its operating efficiency by taking various steps like installing balancing equipments, more efficient use of the available resources. The plant and machinery of the Company are of the state of the art technology. The products of the Company are of the best quality and have been well accepted in the market.

Sugar Industry by nature is a seasonal industry, dependent on the sugarcane crop. Sugarcane being a relatively weather resistant crop is not much affected by marginal changes in climatic conditions. However good rainfall is a must. The steps taken to improve irrigation facilities and other measures have resulted in more and regular availability of sugarcane.

However sugar prices are very volatile and have been very unfavourable. These are not controlled by any single player due to the fragmented nature of the industry. Prices are also affected by the sales allocations made by the Government of India on a monthly basis as well as stocks held by the sugar mills. The Company has a detailed system of monitoring prices and of booking the orders so as to mitigate price volatility and optimize returns.

Uncertainties in Government policies and regulations governing sugar industry in India also continues to pose risk to the sugar industry. The price for sugarcane to be paid to farmers by a manufacturer is also decided by the Government policy from time to time. The Company is therefore vulnerable to the changes in Government Policy and climatic conditions.

As regards confectionery, the competition from outside sources has been increasing. The competition and increase in costs, mainly material costs affect the sales and margins.

**HUMAN / INDUSTRIAL RELATIONS:**

The Company believes that manpower is the most valuable resource for its growth. Industrial relations have generally been very cordial. The Company has recruited competent managerial personnel and the personnel policies ensure strengthening the involvement of all in the development of company.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY:

The Company maintains adequate internal control systems and makes need based suitable changes therein to strengthen the same. The system provides among other things, reasonable assurance of recording the transactions of its operations in all material respects and of providing protection against significant mis-use or loss of Company's assets.

CAUTIONARY STATEMENT:

Statements made in Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations or predictions may be forward looking statements within the meaning of applicable security laws or regulations. These statements are based on certain assumptions and expectations of future events. Actual results could however differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include global and domestic demand-supply conditions, finished goods prices, raw material availability and costs thereof, change in Government regulations, tax structure, economic developments within India.

The Company assumes no responsibility in respect of forward looking statements which may be amended or modified in future on the basis of subsequent developments, information or events.
