## Directors' Report

Your Directors hereby present the 27th Annual Report of the Company together with the Audited Accounts for the year ended Mar 31, 2012.

### Semiconductor - Global & Indian scenario

**Global Scenario:** The Semiconductor industry grew by less than 1% in 2011 despite weak global economic scenario and natural disasters that affected production in Asia. The Semiconductor Industry Association (SIA) projected that the industry's worldwide sales will hit \$301 billion in 2012 – a 0.4% increase over 2011 sales of \$299.50 billion. Beyond 2012, the industry is expected to grow at a significantly faster pace across all regions, Prediction is for a 7.2% growth for 2013 (\$322 billion in total sales) and 4.4% growth for 2014 (\$337 billion).

The PC shipments have crossed the 89 million mark globally in the Q1 CY 2012, showing a growth of a 1.9% over shipments 87 million in the same quarter last year. As per Gartner, a research agency, these results have exceeded their earlier projections of a 1.2% decline for the quarter. Also the Mobile phone production is expected to grow 6.7% with semiconductor revenue for mobile phones totaling \$57.2 billion in 2012.

**Indian Scenario:** The national policy on Electronics will have an impact across the board and present several new opportunities. The demand for electronics goods in the country in 2011-12 stood at \$69.6 billion, with less than half of this sourced locally. With studies pegging the demand at \$400 billion and local production at \$100 billion by 2020, the country is expected to import goods and components worth \$300 billion.

This year will be characterized by opportunities and challenges. The policy if implemented has the potential to be a game changer with far reaching consequences for all of us. This policy will address the huge gap between locally produced electronics and the demand for it. Notwithstanding a weak global economic environment the industry expects boost in demand following the Government of India's decision to connect 2.5 lakh villages with broad band facilities during 2012. Roll out of the National knowledge network project would also be crucial for the industry. Consumer, Industrial and medical segment is also expected to do significantly well during this year.

**Forecast for 2012 by segment:** The communication segment forecast calls for the strongest semiconductor growth in 2012-13 as it will have 5.5% growth followed by computing industry 4.2% growth.

From an application perspective, smart phones, mobile PCs and tablets will fuel semiconductor growth through 2014. Total smartphone shipments will reach 659.8 million units in 2012-13, up 33.5% from the 494.2 million units shipped in 2011. Gartner estimates that semiconductor revenue from tablets will grow from \$2.4 billion in 2010 to \$17.8 billion in 2014. India and Brazil are estimated to be in the top five countries in smart phone usage and sales.

In the PC market, consumer PC purchases grown to 1.8% in 2011 as per International Data Corporation and expected to grow 5% in 2012 and 9.5% in 2013. However, some of this slowdown is being made up for by stronger-than-expected sales of tablets. Revenue for other PC semiconductor components, including CPUs, will increase.

The outlook for mobile phone production has improved. Overall semiconductor revenue from mobile phones is on pace to total \$51.85 billion in 2011. In 2012, worldwide semiconductor revenue from mobile phones is projected to reach \$57.31 billion, a 10.5% increase from 2011.

### SPEL performance during the year

Your Company continues still to be 1<sup>st</sup> & only Semiconductor IC assembly & Test production facility. It is continuously maintaining this position despite the market fluctuations and other external factors. SPEL continues to be a trusted & strategic contract manufacturing partner for many of the world's leading Semiconductor companies.

Your Company faced various challenges during the current financial year and it was addressed efficiently. In the process it also addressed (a) Production bottlenecks to improve productivity (b) Modernization of equipment for enhanced product mix and (c) equipping itself for future expansions. This would enable SPEL to address increased outsourcing from present & potential Customers in future. Due to these pro-active approaches, SPEL had effectively handled the pricing pressures that resulted from the recession and emerged with reduced impact.

### Cause of concern

- The change in Customer loading pattern, i.e. increase in low pin-count packages volumes in place of higher pin-count packages has affected optimum utilization of operating capacity.
- Increased QFN / DFN packages loading at the expense of leaded packages have resulted in skewed capacity utilization creating bottlenecks in certain areas.
- SPEL has to respond to critical Customer's requirement for future growth. They are very high volumes and low Average Selling Price (ASP) products. These requirements can be met only if continuous investments are made in certain Assembly and Test Equipment
- Imposed power restrictions resulted in increased diesel consumption which contributed to reduction in PAT during the year.

**How addressed:** The Management with its strong commitment and extensive support from its Employees, Suppliers & Customers, maintained its position, despite the Global Slowdown and Economic Crisis in Europe. Investments were made to address the vital requirements of operation with Bank's assistance. Your Company is also sourcing alternate power solutions to combat ever increasing power cost.
