23) Leadership Team	

Forward-looking statement

In this Annual Report we have disclosed forward-looking information to enable investors to comprehend our prospects and take informed investment decisions. This report and other statements - written and oral - that we periodically make, contain forward-looking statements that set out anticipated results based on the management's plans and assumptions. We have tried, wherever possible, to identify such statements by using words such as 'anticipates', 'estimates', 'expects', 'projects', 'intends', 'plans', 'believes' and words of similar substance in connection with any discussion of future performance. We cannot guarantee that these forward-looking statements will be realized, although we believe we have been prudent in assumptions. The achievement of results is subject to risks, uncertainties and even inaccurate assumptions. Should known or unknown risks or uncertainties materialize, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected. Readers should bear this in mind. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

The global telecommunications industry is developing dynamically; New technologies are making prevailing technologies obsolete with unprecedented speed.

In such an environment, successful organizations consistently innovate to stay ahead of the curve.

Subex has progressively differentiated its business model to emerge as a future-ready organization.

The Company is leveraging its core competence in the telecom sector, gathering data from customers to create analytics-based products and solutions.

The Company is also enlarging its presence in the attractive IoT security market niche.

At Subex, our efforts are mediated towards the achievement of overarching goal...

MAKING TOMORROW SUSTAINABLE

SIX THINGS YOU NEED
TO KNOW ABOUT SUBEX

PEDIGREE

1

Subex is a trusted global telecom solutions provider for 75% of the world's top 50 telcos. Founded in 1992, Subex has been a part of the evolution of mobile technologies, playing the role of a consultant to global telecom carriers leading to their operational excellence and transformation.

LEADERSHIP

2

Subex is led by Mr. Vinod Kumar (MD & CEO) with a team of experienced professionals who have been around for a while and clearly understands the strengths, challenges, and opportunities of Subex. The company had 900+ employees as on 31st March 2018.

- Leverages a one-of-its-kind honeypot network that combines physical devices and device emulations to generate IoT/ICS signatures
- Evaluates identity and device breaches and updates the Subex Secure signature repository to safeguard the enterprise from emerging IoT threats

Dear shareholders,

It is my privilege to address Subex's shareholders for the first time since taking on the role of CEO and Managing Director of the Company.

The Financial Year 2017-18 (FY18) was a dramatic one marked by a number of challenges. The telecom BSS market, where we predominantly operate, reported flat growth and several countries in emerging markets encountered geopolitical and forex challenges. Even though our revenues were negatively impacted, we completed the year with an increase in contracted order bookings and improved operational profitability.

Our contracted new order booking increased by 15% over the previous year and we ended FY18 with revenues of \$50.5 Million, EBITDA of \$7.9 Million and PAT of \$3.2 Million. Creditably, we repaid our entire outstanding FCCB debt and reduced our working capital debt, which resulted in significant interest cost savings.

We also made significant progress to our products and solutions portfolio. To appreciate this, it is important to understand some key trends of our industry.

Voice revenues are declining: As we approach the Fourth Industrial Revolution, the way people communicate is drastically changing. Voice calling and text messaging that dominated the communication industry, are giving way to internet messaging and VoIP (Voice Over Internet Protocol). This substantial reduction in voice and texting, along with a reduction in tariff have resulted in a decline of ARPU (Average Revenue Per User) and aggregate revenues for telcos.

15%

Increase in our contracted order booking over the previous year

As we approach the Fourth Industrial Revolution, the way people communicate is drastically changing. Voice calling and text messaging that dominated the communication industry is giving way to internet messaging and VoIP (Voice Over Internet Protocol).
