Annexure 2 to the Directors' Report: CORPORATE GOVERNANCE REPORT REPORT OF COMPLIANCE WITH CLAUSE 49 OF THE LISTING AGREEMENT OF THE STOCK EXCHANGES

MANAGEMENT DISCUSSIONS AND ANALYSIS:

1. Industry Structure and Developments

(a) Industrial Scenario

Indian pharmaceutical industry is expected to grow at 19% in 2013. India is now among the top five pharmaceutical emerging markets. There will be new drug launches, new drug filings, and Phase II clinic trials throughout the year. On back of increasing sales of generic medicines, continued growth in chronic therapies and a greater penetration in rural markets, the domestic pharmaceutical market is expected to register a strong double-digit growth of 13-14 per cent in 2013. Moreover, the increasing population of the higher-income group in the country will open a potential US\$ 8 billion market for multinational companies selling costly drugs by 2015. Besides, the domestic pharma market is estimated to touch US\$ 20 billion by 2015, making India a lucrative destination for clinical trials for global giants.

Various industry body estimates indicate the healthcare market in India to reach US\$ 31.59 billion by 2020.

(b) Threats, Risks and Concerns:

Over the past decade, pharmaceutical companies have entered a difficult period where shareholders, the market, and regulators have created significant pressures for change within the industry. The core issues for most of drug companies are declining productivity of in-house R & D, patent expiration of number of blockbuster drugs, increasing legal and regulatory concern, and pricing issue.

Current global financial conditions and the threat of a broad recession accelerated the timetable for implementing transformational changes in global organizations, as the industry confronts lower corporate stock prices and an increasingly cost-averse customer.

(c) Opportunity:

The Indian pharmaceutical industry currently tops the chart amongst India's science-based industries with wide ranging capabilities in the complex field of drug manufacture and technology. A highly organized sector, the Indian pharmaceutical industry is estimated to be worth \$ 4.5 billion, growing at about 8 to 9 percent annually.

It ranks very high amongst all the third world countries, in terms of technology,

quality and the vast range of medicines that are manufactured. It ranges from simple headache pills to sophisticated antibiotics and complex cardiac compounds, almost every type of medicine is now made in the Indian pharmaceutical industry.

The Indian pharmaceutical sector is highly fragmented with more than 20,000 registered units. It has expanded drastically in the last two decades.

The Pharmaceutical industry in India meets around 70% of the country's demand for bulk drugs, drug intermediates, pharmaceutical formulations, chemicals, tablets, capsules, orals, and injectibles.

(d) Outlook

The Indian Pharmaceutical Industry, particularly, has been the front runner in a wide range of specialties involving complex drugs' manufacture, development, and technology. With the advantage of being a highly organized sector, the pharmaceutical companies in India are growing at the rate of \$ 4.5 billion, registering further growth of 8-9% annually.

Your company has a pool of personnel with high managerial and technical competence as also skilled workforce, which provides Professional services.

While keeping its focus on achieving a higher sales growth, the company continues to work on generating cost efficiency in all areas of business management and administration.

Your company is committed to a free market economy and globalization. Above all, it is tapping the 70 million middle class Indian consumer market, which is continuously growing.

We believe that 2013-2014 could be an improvement over the previous years with the economic environment expected to improve on the back of expected government reforms.

(e) Internal control systems and their adequacy:

The Company has an adequate system of internal controls which ensures that its assets are protected against loss from unauthorized use or disposition and all transactions are authorized, recorded and reported in conformity with generally accepted accounting principles.

The internal control systems are documented with clearly defined authority limits. These systems are designed to ensure accuracy and reliability of accounting data, promotion of operational efficiency and adherence to the prescribed management policies. These policies are periodically updated to meet current business requirements.

The Company has a system for regular review of internal controls to assess its effectiveness and the controls are suitably revised to keep pace with changing business environment. Internal Control Systems and processes are reviewed and tested by internal Auditors on a regular basis. The scope of Audit Program is agreed upon with the Audit Committee. Audit observations and recommendations are reported to the Audit Committee, which monitors the implementation of the said recommendations. Further that the Company is carrying the cost audit from the cost auditors and it reviews the cost audit report and take corrective steps to reduce the cost of production.

The Audit Committee addresses the business risk on continuous basis. The Company has taken the initiative to institutionalize an enterprise-wide risk management program and integrate the same with internal Controls.
