The company is a generic pharmaceutical player operating in different countries across the globe; there are large numbers of players in the market ultimately resulting in cut throat competition. During the past few years industry has witnessed various changes. A few other concerns are regulatory risk, growth risk, litigation risk, inflation which ultimately affects the business and volume of the products of the company.

The growth won't come easily for the industry heavily influenced by healthcare reforms, cost pressure; price and value based health care models, economic and political fluidity, public demand for lower cost treatment, low per capita income and consumption of medicines or drug, requirement of heavy capital outlay in the field of research and formulations of new drugs, increased competition and changing regulatory landscape with increased scrutiny and inflation also imposes huge burden to the Pharma sector. The operating environment has become significantly stringent for sub-scale business models, as sector profitability comes down due the regulatory environment become more stringent.
