Social Responsibilities

Your Company enjoys the distinction of being one of the first cement companies in India to be awarded SA:8000:2008 i.e. Social Accountability Certificate for its plant for the last seven years (earlier SA:8000:2001). Social Accounting is a process of ongoing monitoring, evaluation and accountability which helps an organization to measure its performance against social, environmental and economic objectives and ensures that its working is in accordance with its values.

This certification is a result of the sincere and untiring efforts put in by the management for fulfilling its Corporate Social Responsibility over the last decade for:

- Creating green revolution in the desert Kutch region by cultivating land for growing trees, fruits, vegetables and flowers.
- Providing educational facilities through a CBSE affiliated School.
- Providing hospitals and first aid facilities within few hundred kilometers.
- Conducting social awareness programmes on various issues.

Environment and Pollution Control

Your plant is certified for Environment Management System ISO:14001:2004. Stringent internal environmental measures are adopted, adhered to and maintained to run the plant operations in an Eco-efficient manner.

Some of these measures include:

- Kiln Process Dust (KPD) inlet duct modification resulting reduction of 50% KPD waste generation.
- Partially utilizing KPD as a performance improver into the product.
- Enhancing fly ash utilization in blended cement.
- First time in India, successfully completed coal tar trial for utilizing as an alternative fuel in Kiln.
- Enhancing pond ash utilization as an alternative raw material for Clinker.

Conservation of Energy

The MIS Cell and Energy Steering Committee analyses the energy consumption parameters on daily basis with an intention to reduce the high and ever rising cost of energy in the manufacturing process, as well as to reduce its adverse impact on the environment. The Committee constantly updates itself with the new developments in the field of energy including use of alternative resources and its viability for the use in our Plant.

Apart from implementing the measures which were initiated last year, the following new measures have been initiated during the year.

- Kiln inlet seal modification to reduce false air and heat consumption.
- Installation of SPRS (Slip Power Recovery System) in Raw Mill Bag hose fan to reduce power consumption.
- Electronic Control System (ECS) upgradation for process optimization and overall efficiency enhancement.
- Conduct CFD analysis to reduce pressure drop and power consumption.
- Conduct finger print analysis in power plant for process optimization and overall efficiency enhancement.

Impact of the measures mentioned herein above certainly reduces the energy consumption and consequent reduce the cost of energy in the manufacturing process.

Technology Absorption, Adaptation and Innovation

Your Company adopts value engineering techniques for enhancing productivity and cost effectiveness. All efforts are made to explore the possibility of replacing certain imported parts of machineries with indigenous parts for reducing the cost and level of inventory considering an easy availability on time.

Your Company continues to make conscious efforts to evaluate opportunities for technological innovation, upgradation for improving level of operations resulting into savings in cost and enhanced efficiencies.

Research and Development

The Company is conducting ongoing research on product quality improvement, waste treatment and recycling, energy and water conservation and restoration as well as enhancement of green cover in the vicinity.

Benefits derived as a result of the above R & D

- There is consistency in product quality resulting in benefits for the end consumer.
- The Company has achieved noticeable reduction in heat and power consumption in production process by implementing various inhouse solutions. This has resulted in savings of precious natural resources.
- The water conservation has resulted in restoring and enhancing the water table in area.
