BUSINESS OPERATIONS

In the financial year 2012-13, the Global Economy faced fresh downside risks that continue in light of renewed setbacks in the Euro area and continued risks of excessive fiscal consolidation in the United States. Current state of Indian economy makes it necessary for the government to put in place a robust and implementable plan of action for its revival. The economy has

experienced a consistent fall in GDP growth, alarmingly high levels of twin deficits i.e. Current Account Deficit (CAD) and Fiscal Deficit as well as worrying volatility in the inflow of foreign investments. Though inflationary pressure has receded in the last quarter of 2012, it still remains above the target level. This along with other worrying economic indicators has put the Indian economy in a challenging pathway in the short term.
