PROSPECTS FOR THE CURRENT YEAR

Your Directors are pleased to inform you that the Sugar & the Co-generation Plants, promoted by your Company, started their trial run in the month of January, 1999. Both the plants started commercial production from 15th February, 1999 and operated for only 56 days as against the normal sugarcane season of 180 to 200 days. Even during these 56 days of operation, both the plants did not perform as expected due to initial teething problems. The sugar plant had installed many sophisticated equipments imported from abroad which took much longer time to stabilise their workings. However, in the current sugarcane season, both the Plants have started the production from 10th November, 1999 and have been running very efficiently. The Sugar Plant till 15th February, 2000 has already produced 24,300 tonnes of sugar and the Co-generation Plant has also been supplying regularly 5-6 MW of power to U.P. State Electricity Board. The sugarcane availability in the command area of the sugar plant is very good and it is expected that both the plants will be operating for full crushing season.

Your Directors are confident that during the current year, your company will be receiving good amount of royalty from the Sugar Plant and is also likely to receive dividend from both the plants on the investments made by your Company.
