Every care is made to provide quality products, service and excellent ambience at all Seasons' outlets.

OVERVIEW OF THE ECONOMY

The year under review was challenging in many respects for business. The global economy continued to witness slower economic growth despite modest recovery in the US led by housing and consumer sectors. The economies of India and China were forced to tighten liquidity to control inflation, resulting in a demand slow-down. Global events also had a dampening impact on the Indian economy - deceleration in industrial output and lower exports weakened India's economic.

With a clear mandate in the recently held Parliament Elections, the new government is expected to implement wide ranging economic reforms without many of the impediments faced by the erstwhile coalition government. The same sentiment is reflected in the buoyancy on the stock exchange and the rupee has already strengthened against the US dollar and other currencies. The new Government is expected to evolve a growth-focused agenda and improve the regulatory environment in the country.

INDUSTRY STRUCTURE & DEVELOPMENTS

The Textile Industry in India is one of the largest segments of the Indian economy accounting for over one fifth of the country's industrial production. It provides direct employment to many million people.

The Home Furnishings Industry in India falls under the purview of the textile industry. Indian home furnishings manufacturers and home furnishings exporters offers a spectacular range of bedspreads, furnishing fabrics, curtains, rugs, durries, carpets, placemats, cushion covers, table covers, linen, kitchen accessories, made-ups, bed spreads, bath linen, and other home furnishings accessories to the nation as well as to the world. Manufacturers of Home Furnishings from India, whether floor coverings, kitchen linen, bath linen, cushion covers, bed spreads, curtains etc. create a rage in the international markets.

With the increasing textile industry in the country, the furnishing fabric market will also continue to flourish. The home furnishing market is anticipated to witness huge demand with the booming real-estate projects like hotels, hospitals, commercial and big residential apartments.

OPPORTUNITIES & THREATS

- Tremendous boom in retail as a result of change in consumption pattern and private incomes.
- · More and more shifting of the customer towards branded products.
- Growing real-estate projects is expected to bring more demand in the market for furnishing fabric and related products;
- Increased disposable income, especially among the middle class along with the already existing high end customers will fuel the retail boom. Our
 priority categories of product range are expected to continue to witness healthy growth.

However, consumer demand could get impacted due to severe inflationary pressure as the products of our company form a part of discretionary spend basket. Fluctuation in the foreign exchange may further affect the prices for the products. There is always a cheap competition in the market from the unorganized sector in the same business.

INDUSTRY OUTLOOK:

India is one of the leading producers and exporters of home furnishings from bed, bath, kitchen linen to window dressing, carpets and rugs. India is the world leader in carpet exports.

The industry is witnessing all-round growth in the global scenario, which is coupled with gradual rise in demand in the housing and infrastructure. Changing life styles and people's acumen to opt for sophisticated standards are the key factors in its growth pattern too. These factors will help the Company to achieve its projected growth for the future. The Company's continued thrust in retail segment aimed at ensuring a horizontal growth and to extend its reach to the untapped segments has helped in achieving its long term goals which will lead the Company to the consolidation phase later. The Company's expansion plans in the retail foray will greatly help the Company to improve margins, overall return on the capital and eventually shareholders value.

The Company remains apprehensive about possible changes in government policies, which will help to control the inflation affecting the purchasing power of consumers. Foreign exchange volatility is expected to be under control resulting in reduction in the prices of raw materials and finished goods. Market volatility and fluctuating prices of materials are key concerns, which are to be addressed appropriately at crucial stages to ensure projected growth.

INTERNAL CONTROL:

The Company has suitable and adequate system of Internal Control commensurating to its size and nature of operations primarily to ensure that - the assets are safeguarded against loss from unauthorized use or disposition; the transactions are authorised, recorded and reported correctly and the Code of conduct, Policies and applicable statutes are duly complied with.

The Company has established a methodical system of Annual Budgeting and Management Information System (MIS). In addition, administrative and HR activities of the Company are also brought within this purview. The financial results of the Company are reviewed by the Audit Committee every quarter. The composition and role of Audit Committee can be found in the Corporate Governance Report in the Annual Report.

The Company has appointed Internal Auditor to examine the adequacy, relevance and effectiveness of Internal Control Systems. The Top Management and the Audit Committee of the Board review the findings and recommendations of the internal auditor.
