SeQuent Scientific Limited
ANNUAL REPORT 2011-12

Forward-looking Statements

The report contains forward-looking statements that involve risks and uncertainties. When used in this discussion, the words like ‘plans’, ‘expects’, ‘anticipates’, ‘believes’, ‘intends’, ‘estimates’, or other similar expressions as they relate to Company or its business are intended to identity such forward-looking statements. Forward-looking statements are based on certain assumptions and expectations of future events. The Company’s actual results, performance or achievements could differ materially from those expressed or implied in such forward-looking statements. The Company undertakes no obligation or responsibility to publicly amend, update, modify or revise any forward-looking statements, on the basis of any new information, future event, subsequent development or otherwise.

"It does not matter how slowly you go as long as you do not stop."

Confucious

At SeQuent, we believe that nothing toughens like the tough times. 2011-12 was a tough year as input cost continued to rise and key segments faced competitive pressures. The rupee devaluation on account of fiscal challenges in the country resulted in further pushing up the costs. Delay in regulatory approvals led to deferred timelines and low capacity build-up. In addition, at **SeQuent**, we faced few challenges of our own:

- An unfortunate accident at our Tarapur plant impaired our production during Q3 & Q4.
- We patiently continued to await the USFDA audit at our Mangalore plant

**We chose not to stop, but to carry on; not be withered but to persist.
We chose not to wait but to persevere.**

In the wake of growing competition, we continued to develop non-infringing processes, improved product portfolio and at the same time, aimed at becoming a leaner organisation through improved capacity utilization as well as continued reduction of costs. We continued to partner new clients, offering customised high-quality products, based on our demonstrated R&D expertise. We continued to strengthen our units in terms of efficiency, expertise and intellectual capital – thereby utilizing the tough phase to further fortify our business model. In the process, we have laid a strong foundation for sustained growth in the future – through our patience, persistence and above all, perseverance.
