Your Company had during 1996-1997 achieved encouraging acceleration in turnover and consequently in operating profit. However, the period under report, 1997-1998 has witnessed a general economic recession, down trend in overall market demands and particularly in Automobile industry. Though past months of the year have not seen much noticeable change, it is general expectation that the industry will show improved working in later part of the year. The Company has continued its efforts for reducing costs in various operational areas which has helped to mitigate the effects to an extent. Company will continue to strengthen the action taken in this direction for pursuing better results. As reported, real concern for your Company is about the impact of interest incidence.

### 3. Finance :

The performance in the financial year 1997-1998 for working in the scenario as detailed, has been operational loss.
