# a. Industry Structure and Development:

The liberalization of the economy and trade and introduction of new incentive schemas for domestic foreign investments made by the government have resulted in accelerated economic growth, leveling today at 7% to 8% per year against only 1% in 1991. The paper and Board market in India is expanding fast, with the relative long term growth estimated at approximately 7% per annum.

# b. Opportunities and threat:

News print and writing paper presently accounts for 50% of total paper consumption in country and the balance of Industrial paper. Looking at the present scenario and demand supply position worldwide, there are bright prospects for the Industry manufacturing newsprint and writing / printing paper.

# c. Segment-wise or Product wise performance:

The company is dealing in only one type of product and therefore there is nothing to report in this matter.

# d. Out look:

#### e. Risks and Concerns:

The current per capita consumption of paper in India at 3 kg is very low as compared to advanced countries where the per capita consumption ranges from 180 kgs, in USA which signifies the potential for growth in this industry as Indian consumption is bound to increase by leaps and bounds with the fast changing industrial scenario in the country.
