MANAGING DIRECTOR'S SPEECH

Dear Stakeholders,

It gives me immense pleasure to share with you my perception of the business environment and the Company's initiatives on overall growth and operational excellence.

I must confess this year is unusual for the economy. The global economies in 2011-12, witnessed slowdown. Euro zone was worst affected. US economy, though impacted, has now started showing signs of mild recovery. China and India which were driving the global economy for some time are also showing signals of slow down.

Indian economy is most likely to witness GDP growth of less than 8 percent in FY12 after consistently remaining above 8% in last couple of years. Slowing down of industrial growth caused by the tightening of monetary policy to curb unabated increase in inflation is one endogenous factor for the lower GDP estimates for FY12. On the other side, sluggish recovery in global economy especially in developed world has acted as exogenous factor for the present economic situation.

Your Company has always strived to break through these tough times by venturing into varied business segments. However there can be exceptions when the Company's predictions and calculations may not show immediate success. This can be said to be true in its recent predictions for the mining and infrastructure industry.

Yantra has attempted to diversify into Mining and Infrastructure in the year 2010-11. However as the mining sector has witnessed lot of negative political government policies which has vitiated the whole segment, the Company has adopted a wait and watch strategy where it would evaluate all possibilities and then initiate any further development. Similarly, the Infrastructure Sector is also witnessing significant slowdown with order book drying up and nose diving margins. We are hopeful that the situation shall improve in the future, however as of now, it does not make any business sense to commit sizeable resources in these sectors.

Hence, the management has decided to adopt a wait and watch strategy till the turnaround of the industry before initiating any steps in this direction and the Company continues to focus on its core business segments of textiles and investment and is further banking on it to see through this tough phase of the economic cycle. Further the Company would initiate operations in mining and infrastructure only when there is a ray of hope for better and newer business prospects. Also the Indian Textile industry is presently facing an unprecedented period of difficulty due to slow- down in the demand especially from the beginning of current financial year. The uncertainties in the export policy of Government of India related to cotton fibre and cotton yarn have added to the woes of the textile industry. The restrictions imposed on cotton yarn exports in the last quarter of FY2 11 led to huge accumulation of cotton yarn inventory with the mills leading to crashing of yarn prices. Thus the financial stress caused by aforesaid developments is likely to reflect in the reduced profitability of the textile industry in the country in FY12. Nevertheless, we are confident about the bright future of textile industry in long term under improving policy environment. At present, this industry in India is one of the modern as among our competitors such as China and Pakistan. The sub group set up by the Ministry of Textiles on fiber has estimated that the industry will need 35 Million plus spindles till 2020 to produce additional 4000 Million Kg of Yarn which will double our present production.

Your Company is shaping itself well to meaningfully participate in emerging opportunities for Indian Textile Industry in medium to long run. We are also responding to the current challenges of rising costs and nearly stagnant demand reflected in abnormally lower prices as well as less inquiries for new orders. The prevailing business scene is a tough learning period to be nimble and responsive to the changing market dynamics. The Company has initiated a process of reviewing systems and processes across the businesses with the objective of identifying scope of improvement for cost cutting and higher value addition. I believe that with the collective efforts, the Company should emerge stronger through adaptive learning which also can reassure relatively a sustained performance.

With best wishes,

The Industry is going through a challenging phase amidst global economic slowdown. The performance of the Indian Textile Industry has been under tremendous pressure over the last two years owing to intense competition, significant debt-funding capacity, Technology up-gradation and increasing costs. The credit profiles of Textile Companies have become increasingly stressed over the last one year, following significant contraction of demand for textile products in the key markets of the United States (US) and Europe thereby resulting in severe stress for the Companies operating in the segment to maintain its margins.

However we are pleased to inform you that even against this background, your Company was in a position to clock overall revenues to the tune of Rs. 9249.93 lacs as against 5375.73 in the preceeding financial year thereby registering a growth of

about 71.89%. However, the high operational cost has adversely impacted the Company's margins and thus the Company could yield an overall profit of mere Rs. 2.02 lacs.
