Industry structure and developments:

India ranks among the top 5 five countries in both production and consumption of tobacco and tobacco products.

Beedis are rolled from a forest leaf known as "DIOS-PYRUS ME LOMOXYLAN" which is abundantly available in tropical/sub-tropical climatic forests scattered in Andhra Pradesh, Kerala, Karnataka, Orissa, Tamilnadu, Madhya Pradesh etc. Owing to its cheaper cost, this product is widely used by the rural population and certain percentage of low income group among urban population who have relatively poor purchasing power.

Tobacco Industry in India is a labour intensive industry and employs 10 million people. Out of these, around 60 lakh are directly employed in the rolling of bidi activity. The rest are tendu leaves cultivators in the forest areas of the country. Maharashtra is home to around 2.5 to 3 lakh of this workforce. Solapur district alone employs nearly 65,000 workers in different activities of bidi industry. Andhra Pradesh and Karnataka also house tobacco processing units. Bidi products are 100 per cent natural with low nicotine and tar percentages. Also, Bidi is an important source of income, for women, whose earnings constitute on an average 45 to 50% of the total income.

Opportunities and threats:

Our Company's strength lies in the Tobacco processing plant, which is situated at Nipani in the state of Karnataka running exceptionally well, and its expertise is exhibited in developing specialised blends to satisfy its customers. Last year the Company had planned on purchase Tendu Leaves from Chattisgarh Federation, Madhya Pradesh for the purpose of trading and the Company has implemented the same. The major activity of the Company was trading tendu leaves and processing of Tobacco during the year 2011-12. Now the Company is planning to enter into the segment of trading of tobacco.

Our Company's weakness stems from the fact that it is deeply affected by the amendments made in The Cigarettes and other Tobacco Products (Prohibition of Advertisement and Regulation of Trade and Commerce, Production, Supply and Distribution) Act, 2003 and this has impacted the business of the Company. The Government's plan to halve tobacco production by 2015 is also a major threat to the business of the Company, with raw material being scarce, which will also entail increase in costs.

Internal control systems and their adequacy

The Company has evolved a system of internal control which is adequate to its size and nature of business operations. The internal control system is designed to ensure desired level of control over the transactions. Internal audit plays an important role as it conducts audit of all key business areas as per a pre-drawn audit plan. The internal audit, among other things, looks at internal controls and gives suggestions for strengthening them.

The Company has a strong management information system which is an integral part of control mechanism and clearly defined roles and responsibilities, down the line for all managerial positions.

Material developments in Human Resources / Industrial Relations

The company's Human Resource philosophy is to work towards building a strong performance driven culture with greater accountability and responsibility at all levels. The personnel at all levels are made to identify their goals, resources and measurement of their achievement of the goals was sought.

For the workers in the tobacco industry, the Company has taken innovative employee welfare initiatives. Our deep-rooted work ethics ensure that both the management and workers help each other to achieve the goal of production and distribution of wealth upon principles of equity, reason and common good. We incessantly endeavour to create a scalable business model for our people, our biggest assets. These include working towards the benefit and safety through various welfare activities for the workers and their families, which include comprehensive medical and educational facilities.
